

You Can't Travel On Yesterday's Train

The money you spent yesterday won't pay your way to-day. Neither will to-morrow take care of itself.

You must provide.

Provision is only possible when a margin is maintained between income and expenditure, and the amount set aside for future use. It is this accumulation of capital which determines whether future years will be dependent or independent.

By opening an account with us you can deposit as large or as small amounts as you wish, and thus gradually build up a substantial cash reserve.

EDISON ON LAW ENFORCEMENT AND PROHIBITION

"I have never had time, not even five minutes, to be tempted to do anything against the moral law, the civil law, or any law whatever. If I were to hazard a guess as to what young people should do to avoid temptation, it would be to get a job and work at it so hard that temptation would not exist for them." These are the words of Thomas A. Edison, who recently celebrated his seventh-fifth birthday. Of prohibition he said at a meeting of his Ediphone distributors, at the West Orange, N. J., laboratories, August 12, 1921: "It is the greatest thing in America today. Drinking whiskey is a rotten habit. Everybody ought to help to protect himself from it. Even the drunkards should help, and they would if they had plain common sense."

WOMEN TAUGHT TO SHOOT

A number of good shots have been developed among the women employees of the Post Office department since they have been practicing with pistols at various ranges in the large cities, says the New York Evening Post. The practice is to familiarize the registry clerks with arms, so that in an emergency they can protect themselves and the valuable property in their care. Not satisfied with the government schedule of target work, some of them are spending their own time on other shooting ranges, with a view to entering amateur competitions.
