WHY WE ADVERTISE

Our successful practice is largely the result of the reference and recommendation of the thousands of cases whom we have served; however, our realization of the relation between correct vision and health convinces us that there should be continual effort on our part to assist in educating the public upon this important subject.

Of Interest to Farmers

Agrigraphs

Time the rooster was cackled, if the chickens are hatched:

To produce an acre of hay requires an average of ten hours each of man labor and horse labor in New York.

Something to drink helps Biddy manufacture eggs. A hen will drink 20 times her weight of water in a year if she has it before her.

Asparagus beds fenced off for chickens is another example of co-operation. Hens will eat asparagus beetles, but won't harm the plants.

Uncle Ab says: Beware the fair-weather co-operator; the man who puts his shoulder to the wheel when the cart is mired has the right stuff.

Try putting soy beans with your silage corn. They'll just about double the protein content of the silage. Be sure to inoculate the soil if you want 'em to grow.

A conservative policy is safest with new things. Hubam clover grows fine in the garden, but its superiority to the common biennial has not been demonstrated in New York.

Dairy improvement association records show that there's certainly no money in poor cows. Only those whose production is above the average pay for their keep and make a profit. "The Dairy Herd," a new bulletin from the State Agricultural College at Ithaca contains valuable suggestions. Ask for F. 137.

That seed potatoes come from vigorous healthy plants which have yielded well seems to be more to the point than whether they are little or big. Experiments show that whole small seed potatoes are just as good as pieces of big ones. The State Agricultural College at Ithaca has a free bulletin on potato growing in New York. Ask for F. 143.

Homespun Yarn

Aunt Ada's Axioms: "A smile and gentle good manners smooth one's way thru the world."

When you iron the curtains, try wetting the ironing sheet instead of the curtains.

Up-to-the-minute housekeepers use brushes for almost every cleaning job. Kitchens, cleaning closets, and bathrooms are well supplied with 'em.

Furnishings for the sewing room need include only essentials, but "A place for everything and everything in its place" is particularly desirable here.

Hanging clothes on the line properly saves the clothes. See that threads hang straight and that hems or bands, not selvages, hang six or eight inches over the line.

The fight against household insects goes on all summer. A new bulletin on the subject from the State Agricultural College at Ithaca is good ammunition for the fray. Ask for H. 134.

Don't use lemon if your scalp is dry. Pure white castile soap in hot soft water is excellent for washing the hair. The juice of a lemon in the last rinse water will help to correct oiliness.

Pure soap and water is the best cleanser for bathroom floor and wood-work, and a little kerosene will take the most stains from porcelain. Harsh scouring powders take the gloss from painted or enameled surfaces and leave them streaked and worn.

FRUIT PROSPECTS GOOD

According to John B. Shepard of the U. S. Bureau of Markets and Crop Estimates, there are still enough buds left to permit a good crop of most fruits if the weather conditions are favorable between now and the harvest.

Along the southern shore of Lake Erie fruit trees, except Baldwin apples, had an abundance of buds, and there has been no great damage from frost except that 30 to 40 per cent. of the cherry buds have been killed. In other sections of the state there has been more or less damage to other fruit. In Chautauqua County, which has nearly half of the grape vines of the state, 45 per cent. of the grape buds are reported to have been killed.

Summarizing the prospective fruit crops of this state due to late frosts, may be roughly estimated as follows: Grapes 25 per cent., cherries 30 per cent., plums and peaches 10 per cent., apples and pears 5 per cent.

RAIL RATES HIGH ON

FARM PRODUCTS

The report of the Joint Commission of Agricultural Inquiry at Washington shows the average freight rate on grain, hay, livestock, eggs, cotton and other farm products is from 40 to 160 per cent. above the 1913 level. F. L. Utter, president of the Allegany County Farm Bureau Association said to-day. It means, he pointed out, a handicap to both those who sell and buy food. Figured in terms of transportation the commission find the farm is suffering from a 72-cent dollar.

The commission, after investigating the situation for months, has decided to report to Congress that transportation rates on farm commodities are out of all proportion to the price and that immediate reductions in freight rates should be applied to farm products. Mr. Utter declared. This would be a benefit to both producer and consumer, he said, and would thus help to bring about a greater prosperity.

The report further states that, "Regardless of the distance involved transportation charges must enable both carrier and producer to realize a profit from operations." The New York State Farm Bureau Federation is supporting the work to secure lower freight rates for the farmers.

NEW EXECUTIVE SECRETARY

Miss Vogel is an Experienced Tuberculosis Registered Nurse

Miss Laura P. Vogel, of New York City, took up on May 15th the work of the executive secretary of the Allegany County Tuberculosis Committee with headquarters at Belmont. Miss Vogel is a graduate of the Lenox Hill Hospital, New York City; is a registered nurse in New York State and is a member of the National Organization for Public Health Nursing. She has been a school nurse under the New York Health Department for three years and later became a supervising nurse of the department. For the past three years, Miss Vogel has been successively the demonstration nurse for the Washington State Tuberculosis Association and then of the Oregon Tuberculosis Association. She is also a graduate of the 1922 Institute for Tuberculosis Workers held in New York City under the direction of the National Tuberculosis Association.

Miss Vogel succeeds Miss Goulett in the work in Allegany County and will co-operate closely with the County Tuberculosis nurse. The Health Camp at Cuba Lake will form a major part of the summer's work. Miss Vogel will also carry on the general educational activities of the Allegany County Tuberculosis Committee.

SERIES OF SERMONS ON "THE BIBLE AND THE MODERN MAN"

The Rev. W. H. Smith, pastor of the Methodist Church, announces a series of Sunday morning sermons on the above theme. The separate topics are as follows:

May 1st, "A Bird's Eye View of the Bible."

May 28th, "The Witness of the Bible to a Divine Revelation."

June 4th, "The Inspiration of the Bible."

(June 11th being Children's Day, there will be the program prepared for that day, and no sermon.)

June 18th, "An Analysis of Inspiration: Literary Inspiration, Ethical Inspiration, and Spiritual Inspiration."

June 25th, "How to Study the Bible."

While each of the above themes is so presented that each message could stand alone, there is a special benefit in treating them in the order named. All are cordially invited to these special services.

ROUGH ON MOTHER

A minister caught a youngster smoking cigarettes and reproached him sternly as follows:

"My boy, what would your mother say if she saw you smoking like that?"

The urchin answered, "You bet she'd have a fit, them's her cigarettes."

A sweeping verdict for QUALITY

Announcement

Business is opening up very well and will continue better from now on. People who are interested in and need merchandise in our lines, and that includes all of you, will read with interest the following announcement of Bishop & White's new schedule of prices in footwear.

As you very well know the prices that you are paying for shoes in our grades is from \$6 to \$12.50. Beginning with May 1st all prices on our high grade merchandise will be cut permanently to a level from \$2 to \$8, for men and women, nothing higher. Children's shoes will be cut in accordance with the above plan.

Please bear in mind that the wholesale prices on standard merchandise such as we carry have not decreased at all in ten months. But as we wish to put our business on a strictly cash basis, and at the same time increase volume in sales, we are willing to make the above prices, which will be much lower than you will pay for the same grade of merchandise bought elsewhere, in fact from 10 to 35 per cent. less.
