WHY WE ADVERTISE
 Our successful practice is largely the result of the reference and recommendation of the thousands of cases whom we have served; however, our realization of the relation between correct vision and health convinces us that there should be continual effort on our part to assist in educating the public upon this important subject.

Of Interest to Farmers

FIND GOOD MILKERS MAKE MOST PROFIT

Dairy Improvement Figures Show Few High Producers Worth More Money Than Big Herd of Common Cows

Figures recently compiled from a year's record of the Broome County Dairy Improvement Association show, according to the State College of Agriculture at Ithaca, that although a combination of many factors determines the cost of producing milk, the most important is yield of milk per cow. Records show that under nearly all conditions the high-producing cow makes milk most economically. A small herd of high-producing cows well cared for returns more profit to its owner than a large herd of low producers.

In six herds of the association the average amount of milk produced to the cow ranged from 9,705 pounds in the best herd to 3,408 pounds in the poorest one, for the year. The income from each cow above the cost of feed corresponded directly with the amount of milk and ranged from \$206 in the best herd to \$18 in the poorest.

One herd of fourteen head had an average production of 4,936 pounds of milk, approximately half that of the best herd. The income from each cow above cost of feed, however, was only \$74, or a little more than a third of the income from the cows in the best herd. In this case a milk yield twice as large brought nearly three times as much money return to the owner of the herd.

Homespun Yarn

Healthy children, rightly fed, don't easily catch colds and contagious diseases.

Rotate your aluminum kettles for the rhubarb you cook and see how bright it makes 'em.

Aunt Ada's Axioms: "A good rule for conversations; never say anything that anyone might wish unsaid."

Have you visited the school this year? Your interest belongs there if you believe in your community.

Two things that are harmed by strong soaps and cleaning powder, containing alkali are aluminum-ware and linoleum.

Buying cheap shoes that don't fit is poor economy on both shoes and feet. Two good pairs worn alternately is better for both.

The men-folks will be pitching horseshoes, and there'll be a good time for mother and the children too at Farmers' Field Days at Cornell, June 22 and 23. It's a real picnic.

If the housecleaning extends to the attic and includes those old woolen rags and pieces of furs, the moths will have no place left to lay their eggs. A good tight chest containing one or two pounds of fresh naphthalene will protect the things too good to burn up. The State College at Ithaca has other helpful hints in its new bulletin on household insects. Ask for H. 134.

Births

May 2nd, to Mr. and Mrs. Andrew Burr, of Canadesa, a daughter.

May 1th, to Mr. and Mrs. Warren De Neve, of Belvidere a son, Warren Howard.

May 3rd to Mr. and Mrs. East York, of Greenwood, a girl, Bertha Alice.

May 13th, to Mr. and Mrs. Charles Marcy, of Wellsville, a daughter, Florence Loraine.

TREAT ALL GOOD SEED TO GET POTATO CROP

Care Regarding Sources, Soil and Soaking With Corrosive Sublimates Called Best Spud Insurance

Clean soil, good seed, and proper treatment of it are the three elements for success in potato growing cited by the State Agricultural College at Ithaca. All three are said to be important for the production of a good crop. Increases of from 50 to 100 per cent. in yield have resulted from the use of good seed instead of the usual run of uninspected stock.

So much has been said recently about treating seed potatoes, the college says that some growers treat their seed once, plant it in soil which has raised scabby potatoes before, and then because the crop is scabby; lose faith and never treat their seed again.

Soil Important Too
 Planting treated seed in scab infested soil is called a waste of time, since the resulting crop will be just as scabby as it would if no treatment had been given. For scab alone, the college recommends seed treatment only with long rotations and proper preparation of the soil by turning under cover crops.

Given clean soil, however, and seed from selected stock, treatment with corrosive sublimate is good business, the college says, and the best sort of crop insurance. Soak seed one and one-half hours in a solution of corrosive sublimate, four ounces to 30 gallons of water. If this is done in the spring, the spuds should not be stored before planting, but should be spread out on the barn drive-way floor or in some lighted room where they will green and grow thick short sprouts.

Agrigraphs

Uncle Ab says: "Pull together; forget little differences and work with folks who are going your way."

Proper fertilizers in the garden not only increase the yields but they bring good vegetables early.

An investment of \$2.75 in grain for one cow returned \$32.5 in milk, according to the dairy improvement association record.

Most of the neighbors will be headed toward Farmers Field Days at Cornell, on June 22nd and 23rd. Pack the family in the car and join 'em.

New York ranked fifth in value of all crops last year. Only Texas, Iowa, California, and Illinois stood ahead of the Empire State.

Small farms, small yields from crops and stock and scrub livestock are three conditions that are pretty close cousins to small farm incomes.

Deaths

Mrs. Annie G. Rutherford died May 5th, at the home of her daughter, Mrs. W. Herdman, of Angelica. Deceased was born in 1837, in Allen, and is survived by a son and a daughter.

Mrs. Fred E. Williams died at the family home in Angelica, May 5th, aged 69 years.

Franklin I. Hubertus, aged 17 years, died at the home of his parents, Mr. and Mrs. Thos. Hubertus of Wellsville, May 5th.

Mrs. Edward Green died May 13th at her home on Beach Hill. Deceased was born at Findley, Ohio, Oct. 12, 1888, daughter of Mr. and Mrs. Sheridan Graves. Interment was made at York's Corners.

Mrs. C. G. Anderson, formerly of Wellsville and Belmont, died last Monday, at the home of her son, J. H. Anderson of Canisteo. The body was taken to Belmont for burial.

GARDEN TALKS

The Best Spring Tonics Come Out of the Ground. Chard is Leafy Best

Chard is simply a beet with more leaves and less root than other beets. If you like beet greens you will like chard, say the gardeners at the State Agricultural College at Ithaca. It is "cut and come again" crop, the outer larger leaves only being gathered each time and the young inner leaves left to develop. The culture is the same as that of other beets, but more space, eight inches at least, should be allowed between plants. Most gardeners plant too much. Ten feet of row is about enough, unless you want the surplus leaves as green food for your hens.

"I have ever considered it as the indispensable duty of every member of society to promote, as far as in him lies, the prosperity of every individual, but more especially the community in which he belongs." — John Hancock.

Careful studies show that farm woodlots in New York with good management could return more than twice the \$4.64 an acre they did during 1919. Forest Planting on the Farm, a new bulletin from the State College at Ithaca, contains suggestions on making the woodlot pay. Ask for F. 159. — It's free.

A sweeping verdict for QUALITY

Announcement

Business is opening up very well and will continue better from now on. People who are interested in and need merchandise in our lines, and that includes all of you, will read with interest the following announcement of Bishop & White's new schedule of prices in footwear.

As you very well know the prices that you are paying for shoes in our grades is from \$6 to \$12.50. Beginning with May 1st all prices on our high grade merchandise will be cut permanently to a level from \$2 to \$8, for men and women, nothing higher. Children's shoes will be cut in accordance with the above plan.

Please bear in mind that the wholesale prices on standard merchandise such as we carry have not decreased at all in ten months. But as we wish to put our business on a strictly cash basis, and at the same time increase volume in sales, we are willing to make the above prices, which will be much lower than you will pay for the same grade of merchandise bought elsewhere, in fact from 10 to 35 per cent. less.
