

On May 30 we turn back the pages of history to 1861-65 and honor those who, as young men and boys, wrote large their names in American annals.

History's latest chapter gives to all of us a broader conception of what War is and enables us to understand more fully the deeper meaning of Memorial Day.

The Angelica I. O. O. F. Lodge is perfecting plans for perhaps Allogany's largest celebration on this year's 4th of July. An advance note chronicles ball games, horse races, horse races, fantastic parade, big midway, fireworks, dance pavilion, etc.

Wednesday of last week the bell-fry of Saint Paul's Episcopal Church of Angelica was discovered on fire. The flames were extinguished but not until damage to the extent of \$1,000 was done. The fire is claimed to have originated by school boys smoking in the tower.

Miss Ella V. Ricker, assistant librarian of the Olean public library, was the winner of the \$25 prize offered by the Western New York Federation of Women's Clubs for the best essay on Americanism written by a member of a club affiliated with the federation.

The American Legion requests the News to call the attention of our citizens to Memorial Day. It has been observed for the last few years that our people have kept slack in this respect. Let us show our spirit through the colors.

Prof. and Mrs. Lloyd R. Watson who have been located at College Station, Texas, where Mr. Watson had a fine position in college work, are to come north for the summer, which they will spend with Mrs. Watson's mother, Mrs. Eugene Sherman. They will come by water and sailed from Galveston last Saturday, and expect to arrive in New York next Saturday. - Alfred Sun.

Invitations have been received in Andover to the Commencement exercises of the Mountain Clinic Hospital Training School, June 1, 1922. Among the graduates this year is Miss Mary C. Casey, an Andover woman much respected by all in this vicinity. Miss Casey has made good and stands high in her class and among the profession. The News extends congratulations.

Mr. and Mrs. Wm. Pardon gave a farwell-dinner party at their home, Sunday. Those present from out of town were Mr. and Mrs. D. J. McCarthy, Mr. and Mrs. Frank McCarthy and children, Mr. and Mrs. Henry O'Neil, Mr. and Mrs. Bert English, Miss Ruth Downer, Mrs. John Kirner, Misses Pardon, of Buffalo, N. Y.; Mr. and Mrs. T. Mailey, Mr. and Mrs. A. Conlon, Mr. and Mrs. Wm. Crowley, of Elmira, N. Y.; Mrs. J. K. Houghton, of Brooklyn, N. Y.

A small band of genuine Gypsies halted briefly while passing thru this village Friday afternoon. We wondered when a saw them if they were connected with the band arrested at Bath last week by the state police, charged with defrauding Mrs. Jordan of Rochester out of \$400.

Traveling as they now do by automobile, they are more venturesome than in the old days of slower progress with the horses. Village authorities should see that they are ordered to "move on" when they make their appearance in town.

PLANTS GET OWN MOISTURE

Ingenious Device That Will Assuredly Be Welcomed by All Absent-Minded Husbands.

Stay-at-home husbands are prone to forget to water the flowers that adorn the sitting room, even though specially charged to do so by absent wives. They will doubtless welcome a device just invented by a Frenchman, M. Pinson, which enables plants literally to water themselves and to do so with efficiency, taking neither too much nor too little to drink. The device which obtained a gold medal in France, consists of a flower pot of the usual shape, but having a double wall. The descriptor runs, according to the Literary Digest:

The space between the two walls constitutes a reservoir of water. Into this there extends two to four curved tubes, according to the shape of the pot. Each of these tubes contains a wick. The lower end of the tube dips into the reservoir of water while the other end is bent so as to dip beneath the surface of the soil in the inner pot. Consequently we really have a set of siphons which are set in action by the capillary attraction which causes the water to rise in the wick. Thus, there is a gentle but steady flow of moisture to the plant.

In order to adapt the apparatus to the needs of any individual plant it is only necessary to remove the inner pot after the end of 24 hours and note whether the outer pot still holds any water. If so, the plant is oversupplied, since the excess of water has been drawn by gravity to the bottom of the inner pot and escaped through the hole in the center into the outer pot.

"The church should be the place where the lonely gain the sense of companionship; the discouraged new faith and hope, the perplexed fresh insight into duty, the weary renewed strength. It should be the place where those who have been working in isolation come to the consciousness of their oneness in Christ, and the purpose and resolution of each is reinforced by contact with the larger fellowship of which he is part. In a word, it should be at once the source of inspiration and the bond of union for all who love and serve their fellow-men and God."

We welcome YOU to all the services of our church.
