Eskimo Not Dainty Feeder.

The Eskimo is not particular about the cut of his meat. He eats everything physically possible of a reindeer or fish or polar bear (and what he does not eat he wears or makes into houses or tools). Particularly does he seem to relish the frozen stomach of the reindeer. This stomach, full of finely chewed reindeer moss, he freezes solid and moves away, according to Doctor Marquis, until he is ravenous hungry, when a piece is sliced off, thawed out and eaten as a rare delicacy.

Fortune Told by the Pansy.

The streaks on the pansy are supposed to forecast destiny. If the petals plucked is marked with four lines, it signifies hope; five, hope sprung from fear; leaning toward the left, a life of trouble; leaning toward the right, prosperity unto the end; if the center one is longest, Sunday will be the wedding day; eight lines denote fecklessness; nine, a changing heart; ten on one petal, betrothal riches; eleven a long life.

WINDSTORMS AND CYCLONES HIT NEW YORK STATE

New York State has been hit hard and often during the past two years by cyclones and windstorms. People are beginning to see the necessity of carrying windstorm insurance and, why not, for the damage done by windstorms in the State of New York for the year 1920 was more than that estimated by lightning. Would it not be better to pay the small cost for this protection than to wait until after the next storm and then wish that you had made this small investment? If you are interested in getting low cyclone rates in some of the strongest companies operating in New York State then write, phone, or see SADLER & FARLEY.
