Mr. and Mrs. Reader

When you pick up a copy of your home paper, do you ever give any thought to how it was produced or the money that is spent to print it and deliver it at your home?

The newspaper of today, no matter if 25 cents a copy was charged, would be the cheapest thing you bought.

In the first place it represents an investment in plant and equipment of many thousands of dollars.

Its editor and staff work diligently day in and day out to gather all the news and present it to you in readable fashion. It aims to keep you informed on all the news that's "fit for ink."

With the average paper, the price you pay for subscription does not cover the cost of WHITE PAPER.

Yes, the newspaper is the cheapest thing you buy. Think it over. Look it over. Then support your home paper. It's the best investment you can make for it brings the largest returns.

ANDOVER, N. Y.

Few Conquerors Died in Peace

It is remarkable how few of the discoverers and conquerors of the New World died in peace. Columbus died of a broken heart; Balboa was disgracefully beheaded; Cortes was beheaded; Pizarro was murdered; Ojeda died in poverty; Henry Hudson was left to the mercy of the Indians along the bay which he discovered.

Youthful Lover Too Sordid

He was ten, I was eight. He invited me to a carnival one night, and of course I accepted. He treated me to rides, bought me candy, and I had for him, faded when the next day, he came and showed my mother a list that he had kept of all the things he had treated me to, and asked her to pay him back—Chicago Journal.

City's Average Need of Water

American hydraulic engineers in planning for a water supply under the present conditions, calculate upon the basis of a daily consumption of 100 gallons per capita, with provisions to meet an increased demand in the near future. For ordinary domestic purposes the requirements average twenty gallons per capita.

No Place for Isman

Ice has been accumulating in the interior of Greenland since the dawn of history. It is estimated that at the present time the icefields cover an area of six hundred thousand miles, and are on an average a mile and a half thick.

Facts About the Ostrich

The ostrich is the biggest bird on earth and has the smallest brain. It weighs as much as a cow and its brain weighs two ounces. Yet it is not stupid. The ostrich lives to be about ninety years old.

May Grow Rubber in Arizona

In the southern part of Arizona the wild rubber plant grows abundantly, and may be cultivated in a large way if present experiments prove that from it a marketable quality of crude rubber may be extracted.

Gold Practically Everywhere

Gold, the aristocrat of metals, is found to some extent in every part of the world, from near the equator in Africa, Peru and Bolivia to the frozen ground of Alaska, Finland and Siberia.

The Higher Immorality

From an Exchange—There is only one way to get ready for immorality, and that is to live this life bravely and cheerfully as we can—Boston Transcript.

Out of Proportion

Jud Tunkins says modern machinery has got to be such that a plain ordinary human being doesn't look much by comparison—Washington Star.

Qualified for Civil Liberty

Men are qualified for civil liberty in exact proportion to their disposition to put moral chains upon their own appetites—Burke.

Other Side of the Question

"A dog," said Uncle Eben, "is man's faithful friend; which is what he ought to be, considerin' how he eats without workin'."

That's More Like It

If "obey" is to be omitted from the ritual, how about making it "love honor and display"—El Paso Herald.

Cucumber is a Fruit

The cucumber is really a fruit, and not a vegetable.
