

The Banker of Fifty Years Ago

would have been very loth to advertise the fact that he would accept small deposits—many of them would have refused to accept them even if offered.

We know better today. We know that it pays in the long run to give every possible help and assistance consistent with safe, prudent banking, to every one who shows an inclination to forge to the front to accumulate something for old age protection. For this reason this Bank is very glad to accept and protect small accounts.
