Your building material dealer has largely influenced this change. He can advise you wisely on your future building, can give you plans and help that mean greater prosperity. His years of experience are part of the materials he sells you.

"The Standard by which all other Makes are measured"

Swordfish of Mackerel Family.

The swordfish is allied by family ties to the mackerel. It attains a length of from 12 to 15 feet and sometimes specimens 20 feet long have been caught. It has a much elongated upper jaw, which is the "sword," and this is commonly three-tenths of the length of the fish. The body is covered with minute scales. Its color is bluish-black above and silvery-white below, and the ventral fins are lacking. Neapolitan and Sicilian fishermen make great commerce of this fish and its flesh is held to be very palatable.
