

### EXPRESSION

As the musician to whom you like to listen sings or plays with expression, so the garment you like to look upon gives expression to your personality.

This expression of individuality which Stein-Bloch Smart, Clothcraft-Guaranteed and Griffon Clothes, ready-to-wear, are capable of giving you is such as no other clothes seem to approach.

May we show you how one of the New Fall Models will express your personality? Suits and Overcoats at \$50, others at \$25, and also the prices in between.

#### UNDERWEAR FOR TRUE COMFORT \$2 AND UP

When you don this Underwear you'll forget you have it on two minutes after—except for its pleasant warmth!

It fits snugly and never wrinkles or bulges, yet easy fitting for plenty of freedom. Union and Two-piece Suits in all weights.

### poem by UNCLE JOHN

The dreamy eyes that used to haunt me, have ceased to thrill my time-worn heart; no optic artist now can daunt me, no matter how she acts the part. I've lost the keen appreciation that lurks within the youthful breast; I still have spells of palpitation, but that's because I don't digest.

I hate to own that I'm a cynic,—that I have old and crusty grown, but I can pass the hey-day eye-brow clinic, the same as if I'd turned to stone. There's nothing to the pensive languish that Maude turns on at sweet sixteen,—and still, it used to cause me anguish when I was callow, fresh, and green.

I've reached the age of sere and yellow; I've grown to be a sort of crank. You know the years will gird a fellow like iron hoops around a tank. I envy not the mushy youngster that founders in romantic stage I'd rather be a whiskered songster, and smear my dope on printed page.

No community is ever successful unless it has a civic leader with whom it can find fault.

### HOMIEY PHILOSOPHY

AND if it writes that the miners shall go back to work and that the miners shall strike again, and that they shall continue these backward and forward movements until they shall come to see the folly of it all and understand that that which has begun must have an end, and that the sooner man shall avoid the beginning, when the beginning spells disaster and trouble, the better for mankind, the miners included.

### ENEMIES OF AMERICA

Success always produces enemies. We are not discussing the external enemies of America, because her danger is not from without; it is from within. Her menace is being generated in her own bosom.

Let us discuss some of them.

#### FIRST—The bad citizenship of good citizens.

The banker, lawyer, doctor, merchant, minister, teacher, or other professional and business men who spend their entire time looking after their own interests to the neglect of the public's interest, welfare, and success are bad citizens, undesirable citizens.

#### SECOND—Disregard for law.

There is a growing disregard for law. Men are trying to circumvent law; they are devising every scheme possible to escape the operations of law; they are spending every energy they possess to defeat the judgments of law. This tendency is putting our government in jeopardy.

By Rev. M.A. Matthews, D.D.

#### THIRD—Ignorance.

Ignorance is a deadly enemy to society. The amount of ignorance in this country is alarming. We discovered it when we drafted the boys for a late war. A large percentage could not pass the examinations.

#### FOURTH—Selfishness.

The time has come for us to demand that the common school education of this land shall become universal and compulsory. Every child should be forced to graduate from the public schools. The Smith-Towner Bill now before Congress ought to be passed, and the Federal government ought to be made to aid the public school system of this country.

The little red school-house should dot every hill and fill every valley in America; and every child in America regardless of race, color, or condition should be forced to remain in the public schools until graduated from the high school.
