The Greatest Asset of Allegany County

We are hearing much these days about the assets of Allegany County and how these may be developed and utilized--and properly so; for on our wise use of our assets depends in large measure the material prosperity and well being of our people.

But neither farms, nor woodlands, nor hills, nor factories, nor railroads, nor mercantile establishments, constitute the greatest asset of Allegany County.

The Greatest Asset of Allegany County is Boyhood.

Shall This Asset be Turned Into a Liability?

Boyhood teeming with latent possibilities and standing on the threshold of life's responsibilities — this is incomparably the greatest asset of any community.

"The truest test of civilization is not the census, not the size of the city, nor the crops — no, but the kind of men the country turns out," said that wise American philosopher, Emerson.

The kind of men that Allegany County will turn out to-morrow, and each succeeding to-morrow, depends on what the people of Allegany County do to develop this greatest of all their assets — Boyhood.

Ideals which lay hold of youth in its plastic, impressionable age will be the ideals of the citizenry of to-morrow.

Sympathetic understanding, wholesome comradeship, and tactful guidance at this age save heart-breaks, wasted lives and expense to the public in later years; prevent loss and misery, and develop our most potential resource, Allegany County Boyhood.

Potential assets easily become liabilities. The untended field soon becomes a patch of weeds whose seeds are a menace to adjacent farm lands. The most successful industrial enterprise left to itself ceases to produce and becomes a drain on the pocketbooks of its owners. Just so Boyhood may become a liability instead of the most valuable of all assets.

Boyhood not only fixes the ideals which dominate a life of purposeful good — it may also rivet those habits which lead to a career of crime.

The teen age which is not marked by the inculcation of right ideals is pretty sure to be marked by the first mistaken steps; reformatories and detention homes are filled to overflowing with BOYS; men whose average age is only 26 represent five-sixths of the inmates of prisons and asylums.

Without a protecting and stabilizing influence the most potential element in the life of the state becomes — not an asset, but a growing liability.

The YOUNG MEN'S CHRISTIAN ASSOCIATION is making an organized effort to help Every Community in the County to realize on this greatest of all assets--BOYHOOD.
