DRY SENTIMENT STRONGER THAN EVER IN THE WEST

Those who attribute the wine and beer plank in the Democratic platform and Alfred E. Smith's open support of the same, as one of the causes of the defeat of Gov. Miller, have apparently not compared election results carefully.

Pinchot carried Pennsylvania by a record breaking majority and he ran for governor of that state on a strictly dry platform, going to extreme lengths in his canvass to advocate the Volstead act.

Volstead himself was defeated for congress in Minnesota by a minister running on a dry platform whose issue in the campaign was that "Volstead was not dry enough."

The cities upstate as well as Greater New York which has felt the pinch of the alleged favoritism of Gov. Miller to the traction companies, the electric railways, the telephone companies, the municipal electric light companies, the gas companies and other public service corporations, all went against Gov. Miller.

Of course, the dry enforcement issue could not have stopped the avalanche of revolt against profiteering and high cost of living, after it was once under way, but the proper combination of intelligence and courage at the beginning would have averted the moral cave-in of the campaign and prevented its starting in any such proportions. This is shown by the election in Pennsylvania of an avowed enforcement, progressive Republican governor, the election in Ohio of a dry Republican senator S. D. Fess who was a recent speaker at Ambassador Houghton's Republican dinner in Steuben County over the very popular wet Democratic incumbent, and the nomination in Indiana of avowed enforcement candidates for the senate by both parties.
