OF INTEREST TO FARMERS

NEW YORK'S LEADERSHIP

Stands First in Production of Hay Potatoes, Apples, Cabbage and Beans.

New York State's leadership in

New York State's leadership in griculture altho it is generally regarded as an industrial state, is brot out clearly in a report on the 1924 crop production, just issued by the state Department of Farms & Markets in co-operation with the U. S. Department of Agriculture. According to this report, New York ranks first among all the states in the production of hay, potatoes, apples, cabbage, onions, green beans for canning and green peas for market. It ranks second in the production of grapes, pears, maple sugar and syrup, cauliflower, lettuce and green peas for canning and syrup, cauliflower, lettuce and green peas for canning and the production of dry beans and celery.

In addition to its leadership in the production of the commodities mentioned, New York also shares honors with Wisconsin as the most important producer of dairy products, including fluid and condensed milk, butter and cheese.

In commenting on the figures given out. Commissioner Berne A.

milk, butter and cheese.

In commenting on the figures a given out, Commissioner Berne A. t Pyrke of the Department of Farms & Markets said: "Many persons do in realize the magnitude and importance of New York's agriculture. Take the case of fruits and vegetables for example. If the 72,707 cars actually loaded and shipped by railroad from New York points last season were all put together it would wrake a train approximately 550 miles long. Such a train would example in New York City along the line of the New York Central to Albany, across the state from Albany to Buffalo and beyond. Buffalo westward to Erie, Pa. To make this even more vivid, picture a man in an automobile waiting at a crossing for such a train, moving 20 miles an hour, to pass. If he arrived at the crossing at six o'clock in the morning, he would have to wait all day and all night until nine o'clock the next morning to see the rear of the train pass by.

"It-should be noted that these 72,707 cars of fruit and vegetables shipped by rail last season consti-In commenting on the figures iven out, Commissioner Berne A.

such a train to pass.

"If all the hay produced in the state in 1924 were loaded into cars containing 13 tons, it would make a train 4,219 miles long, and the man at the crossing would have to wait over a week for it to pass by.

over a week for it to pass by.

"If these trains of fruits and vegetables, dairy products and hay all consolidated into one train it would be over 6,333 miles long, or of sufficient length to extend from New York to Portland, Oregon, from there to Los Angeles, Cal., and back along the southern Pacific route to New Orleans.

It is addition, all the fruits and

If in addition, all the fruits and vegetables consumed in local markets and all the miscellaneous farm products not already included were to be computed on a carlot basis and added to our train it would undoubtedly bridge the remaining distance from New Orleans back to New York City. Our unfortunate man waiting at the crossing would have to take several months vacation to watch such a train go by. "Such computations," continued the commissioner, "while not especially important, serve to bring out in graphic fashion the magnitude of the agricultural resources of New York State and indicate that the great industrial development in the state has not yet eclipsed its agricultural importance."

Rubbers worn or torn with over-much sliding, coasting or catching bobs may be repaired by vulcanizing at the local automobile repair shop

PARM SURVEY RESULTS

Statistics Taken in Four States Show Rural People Overwhelmingly in Favor.

Surveys covering nearly four thousand farms in four states show that nearly three-fourths of the farmers have adopted improved

that nearly three-fourths of the farmers have adopted improved practices as a result of co-operative extension work in agriculture and homemaking, according to figures just released by the United States Department of Agriculture, which has co-operated in conducting the extension and in making the survey. To be more exact, 3,954 farms in typical agricultural areas of New York, lowa, Colorado and California were included in the surveys and of these 74 per cent. had adopted an average of 3.4 improved farm and home practices as a result of extension effort, according to the information supplied by the farmers and farm women interviewed.

The records of practices adopted were rather better in New York state, says Prof. D. J. Crosby of the state college of agriculture at Ithaca, than in the four states taken together, as New York state adopted an average of 3.6 practices to the farm on 82 per cent. of all the farms. The records thruout were taken in counties where extension activities have been organized for from six to twelve years and where at least agricultural agents and home demonstration agents were employed. In New York state, has also been a club agent for from two to five years in the reas surveyed.

Great pains were taken, says Prof. Crosby, to select areas which would be true samples of agriculture in the secretive restricts.

Great pains were taken, says true. Crosby, to select areas which would be true samples of agriculture in the respective counties and also areas which would accurately reasonable or the control of the country of the c areas which would accurately reflect the extensio neffort expended

even more vivid, picture a man in an automobile waiting at a crossing for such a train, moving 20 miles an hour, to pass. If he arrived at the crossing at six o'clock in the morning, he would have to wait the next morning to see the rear of the train pass by.

"It should be noted that these 72,707 cars of fruit and vegetables shipped by rail last season constitute quly a small proportion of the total state production of these compandities. The rest are hauled by truck and in wagons to our city markets or to canning factories, grape juice plants, kraut factories, etc., while considerable quantities are consumed on the farms.

"In the case of dairy products, if all the milk produced annually in New York State were shipped in standard 40-quart cans in ordinary milk cars, it would make a train 1,574 miles long—extending over the New York City to Chicago and 200 miles further west. Our man at the crossing would have to wait three whole days and six hours more for such a train to pass.

"If all the hay produced in them in the survey was carried out, extension supervisors and specialists visited each farm, interviewed both in the supervisors and specialists visited each farm, interviewed both farm can be wife and his wife, and got from them actual records of what they considered improved practices. as conditions in Wisconsin, more closely approximate those of New York than almost any other state engaged in the dairy industry. He is in charge of all investigations in nutrition in animal husbandry in Wisconsin, and is known as one of the authors of "Feeds and Feeding," by Henry and Morrison, and as the writer of many popular articles and bulletins on kindred subjects.

Another prominent speaker on the animal husbandry men's program is Dr. Carl W. Gay, head of the animal husbandry department at Ohio State University. Dr. Gay will conduct the student judging contest to be held Thursday afternoon, February 12, in the stock judging pavilion of the college. On Friday morning, February 13, at eleven o'clock, he will lecture on the farm horse in the east.

Rude Rural Rhymes

Fasting

I come from grim old Yankee steek, the subsequent to Plymouth Rock. My rebel sires were much inclined to leave some older faiths behind. They had no motive or intent toward cutting down their meals in Lent. They needed food about that time to get the spring work going prime. So this bald bard in early days acquired the local eating ways. He grabbed what ever he could find and ate whenever he inclined, but Lent has later come to seem in some respects a right good scheme for both the laymen and the preachers crowd too much grub into their features. Who sits at meals too long and chummy will get a fat and flabby tummy. We'd all be happier I betcher, if we would seek to follow Fletcher. He slung a mighty wicked jaw and taught marked good ventilators for winter windows.

A big program is offered for for baked potatoes and a cabbage saled. Thin slices used as a sandwich fills ing are fine, too.

If finely varnished surfaces are settled, the damage may be remarked in the top of a double boiler; added by rubbing lightly with sleehely the inclined, but Lent has later come to seem in some respects a right good scheme for both the laymen and the preachers crowd too much grub into their features. Who sits at meals too long and chummy will get a fat and flabby tummy. We'd all be happier I betcher, it would seek to follow Fletcher. He slung a mighty wicked jaw and taught.

Sallie's (Copyright 1924—By Glady, Baker) a mighty wicked jaw and tau mankind how they should chaw. fat and protein, starch and sweet he'd have no time to overeat. I find alas, as age is greater a bigger bulge in my equator, and the straight folks with sucked-in tums may tac-kle all the ple that comes, a swaybacked poet must, you bet, be careful of his silhouette.

—BOB ADAMS

Agrigraphs

Uncle Ab says the folks who come to Farmers' Week are the ones who make it a success.

Life is mostly made up of little things. In making agriculture better, farm bureaus are doing here a little and there a little.

Good rotations increase crop yields, reduce production expenses, and make for a better and more profitable diversity. Spring is the time to plan them.

Of interest to rural editors, country correspondents and the people who read the community paper, is the newest bulletin of the state college of agriculture at Ithaca, entitled "reading copy on the country weekly." It's free and a postcard brings it.

Cattaraugus county is finding out that a 50-50 sowing of oats and bar-ley makes a better dairy feed than oats alone. And the grain is harvested more easily because the stiffer-strawed barley prevents lodging of the oats.

Around Our House

At times it is better to discard certain household furnishings than to buy more. Rooms which are literally crammed with bric-a-brac add neither to the use or beauty of the home. Evan supposing that every article in a room is in itself a thing of beauty, the combination of many such articles may not be a joy forever. Incidentally, each ex-tra object in a room is one more thing to dust and take care of. Spa-ciousness is one of the most restrict ciousness is one of the most restful effects in a home and one of the hardest to attain. Massive furnihardest to attain. Massive furni-ture dwarfs small rooms and many pieces of small furniture will clutter up any room unless they have a de-sirable usefulness. How well have you advertised your

Ordinary window screens covered with muslin make good ventilators for winter windows.

A big process.

The End of the Hunting Trip.

rough khaki of his shirt.

"My darling, my beautiful, precious sweetheart. How I love you. You are everything I have longed for—and I cannot fight against my love:—You are all—beauty and allone.

She would arrive tomorrow and lure. Every fibre of my being throbs for you. I love you and I want you so."

Then I spoke to Mrs. Mitchell and assured her that Ellie would be a look, explaining that father was still at the Beach and that I was all alone.

She would arrive tomorrow and that was that.

I had scarcely replaced the receiver when the bell jangled again.

lure. Every fibre of my being throbs for you. I love you and I want you so."

A bird's clear call to its mate—the water, like tingling bells, danced over the rocks and the wind made music in the trees. All the world seemed made for romance.
I do not know how long we lingered, for love takes no cognizance of time. There were no more discussions of vexing problems, only platitudes of lovers whispered with a meaning that was wonderful and new.
The shadows lengthened and the sun went down, bathing everything in a glory of gold. Slowly we walked back to the camp. Curtiss at the side of the parrow nath I in it.

new.

The shadows lengthened and the sun went down, bathing everything in a glory of gold. Slowly we walked back to the camp. Curtiss at the side of the narrow path, I in it, hand in hand. The others had returned and the odor of bacon and other appetizing food filled the open door. They gave us a friendly greeting. I smiled and sang out a merry paraphrase.

return again. Curtiss and I had only time for hurried adieus as my

I put out my hand and touched his hair which gleamed in the sunlight sifting thru the trees.

"I'm sorry," I murmured softly, "so sorry."

"Why should you be?" he asked at the same time taking my hand and holding it firmly in his own.

"I always bring brightness wherever I go, except to you," was my explaination and there was pathos in my voice. "I'm sorry for whatever it is that makes you feel like the glanced up swiftly and looked deep in my eyes.

"Don't you know what it is, Sal lie? Haven't you guessed? Can't you see that I'm mad for you and that I love you, love you, love you."

Strangely enough he was agitated while I felt only a sweet calm as if my heart was singing a carol of joy.

"Then. why. so lugubrius—about the wouldn't let me kiss you that first night. I wonder if you've changed your mind about it NOW?" I called, putting my face against the rough khaki of his shirt.

"My darling, my beautiful, precious sweetheart. How I love you, wexplaining that faller was still was all you was everthair. "My darling, my beautiful, precious sweetheart. How I love you, low, explaining that father was still at the Beach and that I was all your mind about it NOW?" I called, putting my face against the rough khaki of his shirt.

"My darling, my beautiful, precious sweetheart. How I love you. You are everything I have longed your mind about it NOW?" I called, putting my face against the rough khaki of his shirt.

"Say when?"
"Gee, that sounds natural!" I ex-

"Gee, that sounds natural." I ex-claimed, then I hesitated. "Listen Bob, will Ted Billings be there?" "Not unless you're dying for a squint at him. I'm not" he laughed. "You go to the devil." "I am as fast as I can" he ex-claimed. "Be serious Bob for a minute if

"Home is the hunter home from the rill,

With only a maiden to show for his skill."

I left early the next morning for Jacksonville, promising the Hulls to return again. Curtiss and I had

he Hulls to and I had the phone.

(To be continued.)

President Coolidge Says Somebody Must Pay These Taxes

The Nicgara Falls Power Company sells electricity at the lowest average price received by any gener ating system on the North American "The most important property in the country is transportation and water power. It would appear to be perfectly obvious that if these properties are taken off the tax list by public ownership, the other property of the nation must pay their yearly tax of some \$600,000,000. In the thinly settled agricultural regions this would make an increase of 30 per cent or 40 per cent on local taxation."
