

Eighty Men

Of 80 men of wealth, only 3 inherited their money—77 made it. Every one of them had a Bank Account!

The man who believes he can succeed in business without a bank account is the kind of man who believes the moon is made of green cheese.

Healthographs

Health is an opportunity within your grasp. Grasp it! Cater to it. It's your best friend. Expectoration is a means of disseminating disease. Spitting in public places is that means, par excellence! Tuberculosis is one of the diseases often spread in such a manner and only one. Tuberculosis is probably the most prevalent disease in this country and has well been termed the "Great White Plague." More than one in ten deaths in our great states are due to tuberculosis. It is a disease, incapacitating its victim for long periods before death and causes much suffering and economic loss. Because an individual has not tuberculosis, is not cause for his ignoring the possibility of his contracting it or for his ignoring it. It is not a disgrace to have the disease, but, having it knowingly or unknowingly, it is a disgrace and a gross injustice to the public to spread it. Health is an open opportunity and, fortunately, more than once. Grasp it, but do not spit in public places. H. G. STORNER, H. O.
