

Eighty Men

Of 80 men of wealth, only 3 inherited their money—77 made it. Every one of them had a Bank Account!

The man who believes he can succeed in business without a bank account is the kind of man who believes the moon is made of green cheese.

Healthographs
In our town is many a thing That to our hearts a thrill doth bring But, alas! There are some things That make us feel it isn't true, That Andover is quite "true blue."
—H. G. S.

The Health Officer will never "knock" his town. But he, of all, knows when his town is not "toeing the mark."
Now co-operate! Keep these ideals before you: We are going to have a sewerage disposal system, even if Cuba and other small towns have led the way. Our garbage shall be disposed of at village expense. Our streets shall be the cleanest in Western New York. We shall get rid of refuse heaps and manure piles in the corporation. Our milk supply shall come only from tuberculin-tested cows and clean dairies. We are not too proud or interested to see and act on a chance of community improvement.
H. G. STORNER, M. D., H. O.

Barbers' Notice
Memorial Day falling on Saturday this year, Andover barber shops will be open Friday evening to midnight and not opened Saturday at all.

ADVERTISE 10 YEARS IN RURAL PAPERS

United States Rubber Co. Celebrate Tenth Year in Pioneer Advertising.

In 1915 there were 2,445,866 automobiles in this country. It seemed a tremendous number. Some people were already talking about "the saturation point" being not far ahead. But if there were some men who couldn't see the woods for the trees, there were others whose faith never faltered. It took a lot of vision for them to see that the true market for the automobile had hardly been touched. It took a lot of courage for them to bank on the ultimate success of the automobile in that market. They had both. Back in 1915, the United States Rubber Company said: "The real future of the automobile is not in the big cities but far away from them." It is not in short runs on city streets, but in mile after mile on country roads. So back in 1915 the United States Rubber Company began to prepare for this movement and to help it. In 1915—ten years ago—the first U. S. Tire advertising began to appear in the "home town" papers. Few people saw these papers in their true dimension. Few realized the influence they had on what the people thought and did and wore and bought. Because few people realized the place filled in the minds and lives of their readers. The United States Rubber Company saw. As clearly as it saw that the development of the automobile would be in the smaller communities, it saw that the people in these communities would have to have tires to measure up to the service and tire merchants to sell them. And it saw that in the "home town" newspapers it had, ready to hand, the medium to help it put tire merchandising where it would have to be in the new era of the automobile. So ten years ago people began to read the first U. S. Tire Advertising in their "home town" paper—over the name of their "home town" dealer. They have been reading it ever since. They have seen these home dealers develop their little side line of tires into real business—always with the support of "U. S." Advertising in these local papers. Co-incident with the tenth anniversary of "home town" advertising by the United States Rubber Company. This company announces another long step forward in the perfection of automobile tires—the greatest since the introduction of the cord itself—in its perfected Latex treated—Web Cord Royal Balloon Tire with the flat low pressure tread. Today there are 16,000,000 automobiles in this country. Eighty per cent. of them are owned by men and women on the farms and in the smaller communities. Where there was one U. S. tire dealer in the small towns then there are hundreds today—real merchants. What was only a vision in 1915 has come true in 1925.

WANT ADVERTISING WILL BE USEFUL TO YOU in your campaign to find the buyer who OUGHT to own that property you want to sell—the man who will know that it ought to belong to him as soon as he sees it. Yes—there IS such a man!

Give and Take

Any great public utility must be given certain privileges in order that it may serve the public. In return for such privileges the public has a right to good service at reasonable rates.

The American public is exacting in its requirements for service rendered in return for the privileges it grants. The fact that American public utilities have won the world's admiration is good proof that the best service is to be expected from private enterprise operating under reasonable regulation by the state.
