

WOMAN ASKS BULLETIN TO FIX SAWS HERSELF

Says Men are too Busy and Tools Are Dull—E 94 Will Help Her to do the Job.

Cornell bulletins help women as well as men to farm better and more easily.

A woman writes from Fredericksburg, Virginia, and says: "I am a woman farmer, and my saws are dull and the neighborhood men are too busy with their own saws to fix mine."

"Please send extension bulletin 94 to the address below and I'll try it myself."

The letter was written August 3, and by the afternoon of August 6, the bulletin was on its way to Virginia to help this woman fix her saws.

During the month of July, 77,136 publications were distributed to the public from the state college of agriculture at Ithaca. More than 18,000 of these were in answer to personal requests by mail, and more than 7,000 were given to persons calling at the mailing room in Ithaca.

The remainder were sent to schools, meetings, fair and the like and to persons on the technical mailing list of the college. This is a low figure for the monthly distribution, which runs in the winter to as high as 125,000. Farmers' reading habits vary inversely with the amount of work to be done outdoors, as would be expected, and in the winter the mailing room is one of the busiest at the college.

The most popular single pamphlet is E 47, the list of publications, which is revised monthly to include any new bulletins which have appeared since its last number. This is free to all who will write to the college at Ithaca for it.

Send the poorer apples to canning factories, evaporators and cider mill then the better grades will bring a higher price on the open market.

The Cornell experiment station says a combination of soybean oil meal and corn meal is more efficient in the feed than corn meal alone.
