## Community Confidence Essential

OUR confidence in your community is based solely upon its prosperity. First you judge the community in which it your desire to become a resident, from the standpoint of its churches, schools and its business interests, what pretection the community offers you in its fire as well as police systems. You are the judge of that community. Should it prove to you to be loose or inefficient in any manner, naturally you look elsewhere and you are justified in so doing. If you locate in any community it is done solely on the basis of the confidence you have in that community and the protection it affords you along with its proven prosperity. Therefore you decide that anything worth having is worth protecting. If the chance for a man to invest to good advantage, or earn a good living, or establish himself at a moderate expense where his family desires all the advantages of a well run civic government, he is assured of one thing-Protection. Deriving all these benefits it is up to you to protect your merchants and all business interests. Buy from them. Give them an opportunity to serve you. Keep your dollars in your community. They make you more prosperous. These same dollars come back to you. They minimize your taxes. They increase the value of your own personal investments. Your merchants are willing to help you. It is up to you to help them. Give them an opportunity to serve you. . Demand creates supply and if you give your merchant an opportunity of supplying your needs it will be but a short time that Andover will be able to serve your
