## Like Snakes and Things

A small boy was discussing his teacher. "Sometimes," he said, "she talks about things that are really interesting — like snakes and things . . . . . "

The average mind is rebellious to teaching and preaching and there is a lesson in this story for every advertiser—ourselves included. We do not want to preach. We want to tell you things about electric light and power service that really interest you.

And this should not be difficult, for there is surely no public service that affects the daily lives of millions of people more intimately or offers such unlimited possibilities for new and wonderful progress.
