### Fire Protection

In this connection it is timely to think of fire preven- ment.

Science has contributed enormously to the ad--vancement of fire prevention. How many millions of dollars have been saved by the instrumentalities perfected in the fields of mechanical and chemical engineering it would be impossible to calculate, but every in this country, in fire protection.

non-combustible and slow burning materials have pro-Fire-resistive construction and the development Legislation which has barred the shingle roof, estab- an effort to inject higher education into individuals lished regulations on construction and empowered the whose capacities and inclinations forbid it. authorities to eradicate fire traps and unnecessary fire fighting apparatus have been improved and the sential to equip boys and girls for the highly competihuman element—the professional fireman—has be- tive fields which they will enter in mature years. come a highly trained individual operating under the

brave."

## Boosting for Home

OFTEN we get good sound advice to the effect that ; We ought so far as possible, to buy goods made in the America. It is the theory of the protective tariff ad- \ vocates that when American goods are bought and |consumed the money goes to keeping American work-| | OCT. 1. 1926 ers employed and American capital active. And if it is true, as it undoubtedly is, that we had

ought to favor American goods wherever possible, it is a the goods which are manufactured and sold in our home in community. For just as we are in favor of building \$2.00 up American industries as a whole, we should strive for 1. \$1,00 the progress and prosperity of the town or city BO which we live.

It is a good rule, therefore, to patronize the busi-la ness men of our own community and to purchase sol. far as possible goods manufactured in the home community. A great many American cities feature this |home consumption campaign. They ask the people to |. (buy from local merchants, and they ask the merchants). to push, so far as possible, the goods manufactured at la. home. And communities which feature this patriotic 1. [rule are always numbered among the most progressive] (in the whole country. Their business slumps are few ). and far between and they are often prosperous and 'progressive when communities with less civic consciousness are floundering in the slough of depression.

After all, it is the community in which we live that shapes our character. If the community is clean, pro- it. ressive, with a fine sense of civic pride, and with good in local institutions, we are apt to be happy and progres-I sive ourselves. And to form such a community wells. must keep the civic consciousness alive, and, as far as la TEXT week is to be observed as Fire Protection Week. possible, keep our money at home for local develop-

### An Education

' SKIMPED education is a handicap in life, and it H may be a sentence to failure.

There are different degrees of education, years tremendous strides have been made, particularly course. Some young men and women might spend the + of and still be little better equipped to fill the niche 1. Considerable time and money may be wasted in

But it is an inescapable fact that every child should i hazards has accomplished much. Water systems and have a common school education. It is universally es-ill.

These are things well worth remembering as the lin. new school year opens. Especially should parents not it. Seventy-five years ago the first alarm telegraph permit adolescent minds to be weaned away from was invented and in 1925 was installed in the city of school by the romance of business or the desire to have Boston. This was the instrument originated by Dr. W. more spending money. Youth is liable to go up blind h.

Teachers, too, can be of great value in holding li
