Sieek looking animals. It almost against disease.

Many young men, unfortunately, seemed a pity that they were being against disease.

When babies' shoes are new, they be should be at least three-fourths of girl, could not retain her self-respect tained by scattering their roughage of it. There was around 200 of the self-respect to the body against disease.

When babies' shoes are new, they girl, could not retain her self-respect tained by scattering their roughage of it. There was around 200 of the self-respect to the body against disease.

When babies' shoes are new, they girl, could not retain her self-respect tained by scattering their roughage and inch longer than their feet, and if suddenly given a million dollars that Joanna, as a typical modern to the body wagered Eggleston a million dollars that Joanna, as a typical modern that Joanna, as a bruce parton, student of characters of these fine creatures nearly ready for an inch longer than their feet, and if suddenly given a million dollars, over a field and allowing them to ton, who now has come to have a eating, or by feeding some of the fatherly love for her. He adopts roughage some distance away from Then he gives her away to their shelter. If winter pastures steers. The reply was very emphatimes so they will be in good shape Wilmore, the only man who she are used, no other arrangement for

More than 50 per cent of the people of the United States now use electricity in their homes. Every year they invest in electrical equipment \$200,000,000 and buy \$25,000,000 worth of electric power to operate it.

If you live in the Niagara power zone, you probably belong to the progressive 50 per cent—the people who are eliminating needless drudgery from their homes and factories. The per capita consumption of electricity in this district is the greatest in the United States—due, undoubtedly, to the availability of cheap and abundant Niagara power.

Experts say power consumption will increase enormously. Hence, the Buffalo, Niagara and Eastern is investing many millions of dollars in improved equipment and added facilities to meet the future power needs of the territory it serves.

> The Niagara Falls Power Company sells electricity at the lowest average price received by any generating system on the North American Continent.
