ICAKS from Now

All experts agree that the electric power requirements of New York State will be at least double the present figure in 1936.

Where is all this added power coming from? Expensive coal or economical water-power?

One thing is sure. No additional power will be developed by conversation. If New York is to held her proud position as the Empire State, it is time something was done about it!

The Niagara Falls Power Company sells electricity at the lowest average price received by any generating system on the North American Continent.
