GAS CONSUMERS Use Natural Gas BUT Do Not Waste It

MORE GAS IS WASTED IN WORN-OUT AND INEFFICIENT APPLIANCES THAN IN ANY OTHER WAY

Please look over your gas appliances and have them cleaned and properly adjusted. This will save gas, reduce your bills and enable us to give better service during the cold weather.

Many appliances are out of date and wasteful and where it is possible, should be replaced by those constructed to burn, gas efficiently. It is especially important to gas consumers to avoid waste under the new rate which has been in effect since the reading of the meters in November. This rate has been approved by · the Public Service Commission.

This company is anxious to give good service at all times, but as the natural gas supply is limited and becoming less each year, gas consumers can improve their service materially by using gas as efficiently and economically as possible.

Empire Gas & Fuel Company, Ltd.
