> Less than cartare to the beach...

for robust SUN-HEALTH

THY do "flu" epidemics always occur in the winter? Why do we lose energy in winter...and gain it again with the coming of spring? "Lack of sunshine," say leading physicians. "The sun brings us vigor and vitality, as well as light. So in the winter, when there is little sunshine, our resistance to disease ebbs."

This year, keep well. Visit our near-. est electric shop or your electrical dealer . . . see the marvelous new electric sun-lamps. They offer you tropical sunlight all winter long... for less than carfare to "the beach."

For never has your electricity been cheaper. While the price of most necessities has almost doubled, Niagara Power Service costs you less today than when telephones were a luxury.
