More color, perhaps, than ever before will be used, but the blending of contrasts will be such as to add beauty not possessed before. Not only in new houses lows" are invariably men who reason things out before has the changed tendency from the drab and inappro- they begin to make a noise. priate been noted, but even more revealing of the great possibilities of color are the growing numbers of old work and his bull dog tenacity. homes which are undergoing transformation in appear-

Take a dollar bill for instance. It may stretch a little, but it doesn't pause to yawn.

A Hobby With Business

WF EVERYONE could develop some sort of hobby, life would have a greater zest for all. Those persons who become experts upon something completely outside ANY fool can ask questions, but it generally requires the work by which they make a living, have added 100 A wisdom to answer them. per cent. to their own enjoyment of life. Everyone likes and understands his job, presum-

mastery of any subject. Then if he added another in- we complain? terest, a hobby, he is extending his interests and widening his horizon. Life comes but once to all, and it is short at best, ourselves?

so every day ought to be lived to the utmost. is what a hobby leads one to do. After hours, when people while we perhaps feel ourselves just a little suthe day's work is done, then to have waiting for one perior to those who are less fortunately situated than another completely different line of work, developed, ourselves? not because one has to do it in the business of making a living, but done because one's natural inclination give him that direction.

Mrs. Herace Cook, whose vocation is being an efficient housekeeper, and a good wife and mother, loves birds. Not centent with just enjoying them for hooks us in the same way? their lovely songs and their gay colors, she many years ago began a study of them. She read books on birds, ing every endeavor to cover up our own? and talked to those who were authority on the subject. Then she took her books to the woods.

identify the little singing, hurrying creatures. She ob- gence? served for herself their habits, where they built their nests, what they liked to eat, when the migrating birds fiture of others and then become peeved when the joke could be expected to appear, when they left again. And is on us? she learned to call them. When she goes to the woods she attracts her small friends about her with a mimicry resent their criticisms of us? of their own songs.

Mrs. Cook has become so proficient in her hobby that a few years ago she was invited by the govern- flect upon the other fellow—we could hardly expect to ment to become a part of the great machinery that has be otherwise—but why? to do with the tabulation of the habits of birds. Her hobby has become of value to others besides herself. and she has broadened her life immeasurably by pursuing it. A vocation is the business life, while a hobby they can see what they are doing, decoration.

worlds, while reformers are trying to make something gallon. However, you can't run your automobil out of this one.

Continued Carelessness
