Rural Hazards

The authors declare that every farm owner is his itself. own building inspector and is responsible for any construction that constitutes a fire hazard.

Location of farm buildings is a matter of primary beauty which all enjoy, especially in the decline of life concern on farms. The authors discuss the comparative Old age comes to everyone, and it can be made more up all for the kingdom." Problems desirability of having farm buildings close together for pleasant by the exercase of forethought and the exconvenience in doing chores, and at considerable dis- senditure of a little energy before the heritage of youth been a better question than the Mr. and Mrs. Wesley Grenolds tances from each other for safety in case of fire. The and middle age has passed on to the next generation. this man of property loath to devote Troupsburg and Mr. and Mrs. of construction which make for safety from fire in the farm home, and these suggestions are no less valuable that warbles like a canary. He probably caught it in you to come with us. for home builders in towns and villages not regulated his cellar. by urban building codes. Special attention is directed to the common danger points in construction, the cellar, the roofing, the stairways, the chimney and its connections, the fireplace, and the heating and lighting THE average American housewife spends more time "What is the Holy Ghost?"

lems and emphasizes the importance of using fire stopping in the framework of the building and also the desirability of fire-resistant construction in the floors of the first story above the basement.

"Statistics published each year on the annual loss " of life and property in farm fires," say the authors in par the introductory paragraph, "should cause the owner in that such figures mean little to him, and he has a Even ornamental draperies and window shades of gay no introduction to the people of Ithaca returned to Greenwood for Village, Farm, Oil and Other Propsublime faith in his own immunity from disaster.
