By J. HARVEY BACKUS & SON OUR KEYNOTE: "If There Is Not A Way, Cut A Way"

The Fourth of July

THE real significance of Independence Day comes I from an understanding of its meaning, a realization its elders, but it sees much and remembers much of of what the Fourth of July stands for in American what it sees and hears.

idea that the Fourth is the day we all take a vacation of ignomy. and try to see how much noise we can make. Rather, every school child should be able to quote self. from memory the essential part of that immortal Declaration of Independence:

"We hold these truths to be self-evident, that all men are created equal that they are endowed by their a canoe decides to change places in the middle of the Creator with certain inalienable rights, that among stream. these are Life, Liberty and pursuit of Happiness. That to secure these rights, Governments are instituted among men, deriving their just powers from the consent of the governed."

majestic interpretation of the economy of the Universe. This was their lofty, and wise, and noble understanding of the justice of the Creator to His creatures." Americans today may well ponder carefully the sand miles. expressions of these great men who gave years of thought and efforts to the forming of our national ideals and who wrote these ideals into the two great basic documents of our civic life—the Declaration Independence and the Constitution of the United

The Declaration of Independence declares the doctrines of equality, liberty and that a government de-live on thrills. rives its just powers from the consent of the governed. Equality means fraternity, brotherhood, fairdealing, exclusion of no one from public benefits because elves. of race or poverty or lowly birth. It does not mean social equality, or equality of wealth or equality of a good book has largely been lost, because of the nerinherent ability. The Declaration referred to political vous unrest that abounds, and the demands of the equality, which means equal opportunity under the law. multiplying activities that take us away from home. The national ideal of liberty has been the first "

watchword on our lips. To assail our union, our gov- orm opinions of our own, based upon sound judgment, ernment, in the interest of personal liberty, license, but are content to accept second-hand views, being unbounded freedom, is not liberty as conceived by the noved by selfish appeals that are based upon prejudice writers of the Declaration. It is, rather, to break our or greed or pettiness. national idea into pieces and to rush back toward the ness to form co-operative government, without which the place of the mind. we would still be roaming the wilderness and fighting [for our daily bread. .

The other vital thing in the preamble of the Dec- capita intelligence, rather than from our per laration of Independence means that government is to wealth. be from the bottom up and not from the top down. The American theory is that all power rests in the people as a whole. A tendency to depart from this troughs for the horses, but it is getting so nowadays system in recent years has been the greatest source of that you can't even find them in the barn lots. trouble. Only by holding to the representative form of government as established by our forefathers, can our republic endure.

A Service Outstanding

THE case is reported in the press of a letter, written by a soldier during the Civil War, which was delivered a few days ago to a relative of the one to whom it

partment functions with great precision and provides splendid service for the people.

livered promptly. The postoffice department is in receipt of frequent letters commending mail service, but none quite equals prohibition has been a failure, to do away with it now Rude Rural Rhymes

THE VALUE OF

SOUND BESIGN

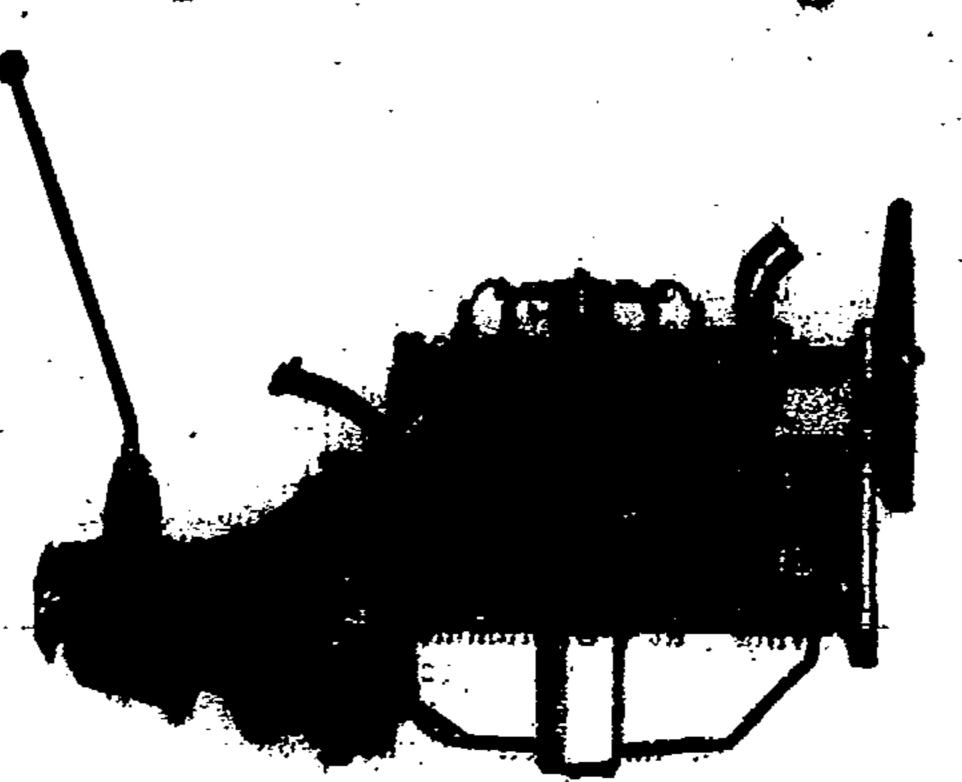

New Ford engine gives outstanding acceleration, speed and power without sacrificing reliability or economy

THE good performance of the Ford car, so apparent on every highway, is due largely to the sound mechanical design of the engine.

It has outstanding acceleration, speed and power, yet that is only part of its value to you. Greater still is the fact that it brings you all these features without sacrificing either reliability or

That is the reason the Ford car has given such satisfactory service to millions of motorists all over the world and has been chosen by so many large companies that keep accurate cost figures. In every detail of construction it has been carefully planned and made for the work it has to do.

The design of the compression chamber is an important factor in the efficiency of the Ford engine. It is built to allow free passage of gases through the valves and to thoroughly mix the fuel

by producing turbulence within the cylinders during compression. The spark thus flashes quickly through the whole fuel charge, resulting in quieter and more effective engine performance. Other factors are the direct gravity gasoline feed, the specially designed carburetor, the new hot-spot manifold, aluminum pistons, chrome silicon alloy valves of larger diameter, statically and dynamically balanced crankshaft and flywheel, the simplicity of the electrical, cooling, lubrication, and fuel systems and accuracy in manufacturing.
