Eighty percent searching for the natural enemies of foreign insect of the fires are preventable, and forty-one lives are rests and whenever found the enemies are brought offered up every day as a human sacrifice to the fire here to be enlisted in the continual war being waged. demon. depredations of insect pests continue to increase, an begin to take fire prevention seriously. Then the pernually. In this fact the department sees the grave cent of preventable fires occurring annually will be danger of the future. And it is for this reason the reduced. department sees the grave danger for the future. And it is for this reason the department hurries to attack the first appearance of new insects in country, anxious to subdue them before they become TITE wouldn't be bothered so much with bad roads i such a menace as the boll weevil became.

Roadside Hoboes

THE motorist, as a rule, is notoriously unselfish in sharing his machine with wayfarers. The method of young men "beating their way" across the country them free from rust. has changed from railroads to antomobiles and scores of them now boast of traveling through many states without cost and with very little walking.

The driver of an automobile will naturally sympa-velous inconsistency? . thize with a lonely walker on a country road, but the results of giving strangers a lift shows that it is a beries that have been committed by chance pick-ups. man gravity. That is not to counsel against "picking up" a friend on the way down town. That courtesy is due every

walker from friends who drive machines. It is the stranger in a strange country that is to be wasn't for cutting them up for water, gas and sewer avoided. He may be above injuring a benefactor, or repairs.

o long the life of its currency by investing largely in a and William G. Streh, brother of all help the good cause, special type of machinery that would clean notes soiled in circulation. At approximately the same time, the tired in a gown of white georgette Miss Jane Kellogg, daughter of day. Bureau of Efficiency took a hand and announced that and carried a bouquet of Talisman Mr. and Mrs. W. G. Kellogg entered TARMERS sometimes complain of birds eating their and they recommended economy in form of a cheaper blue ensemble with accessories the ink used for printing the notes was too expensive, roses. Her traveling suit was a Camp Kanakedea at Alfred, conduct a crops, forgetting that in comparison to the good brand. That sounded sensible enough, so the govern-match. W. G. Stroh played the expects to be there for a two-week' done, the feathered policeman of the field is the great-ment prepared for a double saving on its currency wedding march and Miss Florence period. that would cut a nice slice out of expenditures. The Following complaint of an Iowa farmer, two pheas- laundry powder, however, refused to play with the ants were killed and examined, and 200 cutworms new ink, and the resulting color scheme kept secret-

Checking a Big Loss

unable to make any headway against the pests and Lalike in the forest, the city, the country, the home. factory and shop, and when vigilance relaxes, ruir The boll weevil, withstanding all man-made attacks, and destruction are the inevitable penalties.

ing the remotest corners of the earth for parasites seven minutes of every day a farm home is destroyed and insects which may be brought to the United States with little concern, apparently, and never give fire to fight pests here. Bugs discovered possibly in the prevention much thought until we suffer a personal ported to America and planted in the hope they may | Each hour of the day, every day in the year, the

homes of fifteen families are lost by fire, and each The original introduction of pests like the boll wee-day in the year 1,500 fires take place in the United Lives have been sacrificed and billions of dollars in

But in spite of the supreme efforts being made, the Perhaps, some day, the people of this country will

Costly Delays

We were more prompt in repairing them when they first begin to go to pieces. If you dip a saw in a pail of water and wipe it off

thoroughly afterward, no harm will be done .. But the dampness is allowed to remain a few hours, the saw will be a mass of rust.

Roads cost many thousands of dollars, and we allow them to become ruined from neglect. Can you supply a satisfactory reason for such mar-

hazardous practice because of the number of rob- what is needed most of all, is one that can fool old

The old Roman roads, built hundreds of years ago, are still in use. Probably ours would be too,
