without an Electrolux at this price. Pure sparkling ice cubes, delicious no gas can flow until you light it frozen desserts, perfect food preservation—all this at the cost of a few pennies a day. This refrigerator has a lower operating cost than any other automatic refrigerator, and only half as much as what you now probably pay for ice.

The reason is simple gas and water are relatively cheap, and Electrolux freezes with a tiny gas

flame and a little trickle of water. Absolutely Noiseless

There is no machinery, no moving parts at all to make the slightest sound. Electrolux is noiseless when you buy it, and forever after. With no machinery to stop and start, the cold is constant and the temperature varies scarcely at all from the ideal food-preservation point. That's why, too, you always have plenty of ice cubes on hand.

Furthermore, there is nothing about an Electrolux to require your attention. There is nothing to wear out or replace. The refrigerant is hermetically scaled inside a rigid one-piece steel unit and
