other signatures which illustrate the delicate penman-problems of our day. ship of James Madison. All are originals and have to do with the early history of the United States. No pains have been spared to save them. The task is well worth while. Americans who have

visited Paris, and who have visited the Quay D'Orsay or foreign office, are keenly interested in an opportunity to see the early treaties between this nation an France, all marvelously preserved, and all marvelously cherished by the French government.

A big city is a place where you can live all your overdone. life and still feel like you are away from home.

Are Expert Buyers

HERE are more than 22,000,000 homes in the United \$36,000,000 for every working day.

purchases if she will but make up her mind to read as many as she can of the advertisements which merchants are printing for her benefit.

-guide for this greatest force in the world. This advertising makes it safe and easy for every member of this buying army to make her purchases.

It establishes in her mind a buying habit and gives her a preference for one brand of goods to another world he has hung out his shingle and has been for on an advertised article to one that is unknown. t identifies for her a certain product as being take long journeys to minister to man's needs in standard, so that she may easily dodge the wiles of sell- dark hours.

ers who try to dispose of something that is not so good. It makes her know the dealer who is proud of his merchandise and jealous of his reputation and character cannot do otherwise than make his goods at least as good as he says they are.

Plenty of people who have a diploma from school of experience are still paying their back tuition with a high interest charge tacked on.

British Auto Laws

TITHEN the British undertake to deal with a puzzling situation by law, they can be expected to be very steep hill. thoro about it.

The British parliament is now considering a bil designed to reduce traffic accidents. It goes much further than any law the United States yet considered. To begin with, it would license all drivers, make American Education Week, during which time teachcareless driving and compel every autoist to carry li bility insurance. It would install mechanical governors on all autos to keep them from exceeding the speed limit. It would borrow from the rules of navigation a provision requiring any driver, when he sees any danger of a collision, to stop his ear at once. These are drastic measures. The British don't

things by halves. A billion safety pins are manufactured annuall in this country. Everyone will be glad to hear there

is still something safe being made.

A Bad Winter Feature

ANE of the worst features of the winter season is the U amount of illness that is caused by the various forms backward. Consultation with the teacher dof influenza, grip and ordinary colds. Absence from had when poor grades become too common. work on account of these maladies are a severe blow to a physical defect is responsible; then the attention industry and business. The delegates to the National Safety Congress were informed that 20 per cent. of all claims on benefit associations made for illness were

made on account of influenza or grip. If people could only avoid getting these diseases, they would save themselves discomfort, doctors' bills. loss of wages and danger of serious illness. The people who get all the fresh air they can, who

Fresh air is a wonderful medicine.
