for the world.

The Study of Latin

CAYS a college professor presiding at a "classical conference:"

having studied Latin, has a disciplined mind." subjects, many of whom probably have pretty well dis- amount of waste matter in the statute books. ciplined minds, too. But there may be something in the point made by the professor.

Latin is usually prized-when it is prized at allbecause it contributes to the learner's vocabulary. he understands Latin, he can recognize at sight most the new words he meets, in English or other languages, and can use his English vocabulary more accurately. There may be greater value, however, in the mental training gained. Latin has been called a "logical

language." It shows its logical structure more clearly FERTAIN eastern states have reduced automobile ac- means of "dry ice" so that they than English does. My Next Car A FORD"

When you buy a Ford there are two things you never have to worry about. One is reliability. The other is long life. Here's an interesting letter from a Ford owner in North

"My Ford was purchased May 8, 1928, and has been run 121,767 miles. It has never stopped on the road for repairs of any kind whatsoever except punctures. "The brakes were relined at 101,000 miles. My gas mileage aver-

aged 21 miles to the gallon, and on tires, 19,000 miles per tire. I travel over all kinds of road conditions-mountainous and flat. "I consider this a wonderful record and I assure you my next car will also be a Ford."

This is just one of many tributes to the reliability and long life of the Ford. A Ford owner in Iowa tells of driving his Ford 73,000 miles in a single year. Another writes of 120,000 miles of good service.

Think ahead when you are considering the purchase of an automobile and consider what it will be like after thousands of miles of driving. Will you still be satisfied? Will you still say "it's a great car"?

If it's a Ford, you know everything will be O. K. It will be taking you there and back in good style, just as it has always done. And you will have saved many important, worth-while dollars in cost of operation and up-keep and low yearly depreciation.
