CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. This pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria have him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drug store; the genuine always bears Chas. H. Fletcher's signature.

Genuine Heart Disease

If ever a fellow needs skilled medical advice, it is when the heart becomes really diseased. My object in this talk is to try to make the layman understand his heart better, so he may seek competent counsel at once, if he suspects trouble with this vital organ.

Remember, it is not the blood in the big caverns of the heart that sustains the heart-muscle itself. The heart-muscle has its separate arteries and veins, just the same as your leg has. The coronary arteries of the heart-muscle supply it with blood, and these are, probably, the most responsible vessels within the human being.

If a coronary artery becomes plugged up, the heart-wall beyond the obstruction begins to weaken, because it is deprived of food. It may be "plugged" by bacterial processes—the infected heart. This may occur in a rheumatic subject, or in cases of influenza, or a chronic infected throat—hence the rush to remove tonsils, teeth, etc.

Probably obstruction in the coronary arteries is next to valvular disease in frequency; but diseased valves make loud heart murmurs—easily diagnosed. I have had many patients who knew they had a "leaky heart." But there is not much, if any, noise about a plugged artery in the heart, and there is much more danger—much more.

The principal symptom, WEAKNESS AND SHORTNESS OF BREATH. One fails markedly in coronary disease, and, it takes a physician to diagnose and treat it. Don't depend on home treatment until it becomes forever too late; and don't depend on physical exercises or manipulation-treatments. I'm advising you right.

Light cherry colors in the kitchen help to make the work lighter and cheerier.

Just one hot dish in a school lunch will help keep the child happy and healthy.

The oil well on the Hyland farm of which we spoke last week, filled 200 feet with oil (about six barrels) in two and a half hours after being shot. Gas was struck at 680 feet and oil at 725. The well was shot with ten quarts of nitro glycerine in gas sand and 30 quarts in the oil sand. The company is disappointed in not finding more gas, but quite well satisfied with the result as to oil. They estimate the well good for five barrels a day.

Hears It's Triplets;

Pa Takes a Holiday

Knoxville, Tenn.—"It's a girl!" Manning M. Stinnett, blacksmith, heard the words at his shop near Townsend, Tenn., and started for home.

On the way another runner met him and announced: "It's two girls!"

Stinnett quickened his steps. Half way home a third messenger greeted him with: "It's two girls and a boy!"

Stinnett then broke into a run and verified the report of triplets, four pounds each. Stinnett knocked off work for the rest of the day.
