ANGEL food cake! A 10 year old school girl! Looks almost like magic, but here's the secret. She cooked it electrically.

Cooking isn't guesswork any more. It's as easy as clicking on lights! Two simple controls do the baking for you. One keeps the heat at exactly the right temperature. The other clicks it off when the baking is done.

No watching or oven peeking. Hours of freedom out of the kitchen. Dinner deliciously cooked and ready to serve when you return from an afternoon's shopping. You must see the new electric ranges! Improved cooking coils flash into instant action... heat the oven to 450° in 13 minutes, heat a quart can of peas in 8

Insulated ovens keep the heat and moisture inside where it belongs... reduce shrinkage to almost nothing. And best of all, it costs but a few cents a day to cook this modern way.
