## HOW MANY DIMES

URING the cold winter months, your food will need correct refrigeration just as much as in hot weather.

Kept in window box or on the back porch, food will often freeze during a cold night and then thaw the next day. Ten per cent of it can be spoiled and wasted in this way. Stop throwing these dimes into the garbage can! Keep your - food safe all winter long in the steady, below 50° cold of a good refrigerator. Use up all your left-overs. Take advantage of bargain day offers on food-buy food in larger quantities at lower prices-keep it fresh till needed.

You'll find that a good refrigerator will actually save enough in food to pay for its own cost! Drop in today at your refrigerator merchant's or any Niagara Hudson System Store. Ask for some tasty new refrigerator recipes!
