# TURKEY AN' FIXIN'S"

taste grand cooked this modern ELECTRIC way

"I NEVER realized till now," confides one of our customers, "how much time I used to spend, watching Thanksgiving dinner. Now with my electric range it takes me just one minute to put turkey and "fixin's" in the oven, and then I forget it. When we're ready for dinner, it's all cooked and waiting."

This woman and a million others know that an electric range saves them time. Automatic control keeps the oven at a just-right temperature. Another control clicks the heat off when cooking is finished. Does away with oven watching entirely. And the sealed-tight oven keeps in food juices—cuts shrinkage to almost zero brings out luscious flavor!

Electricity is clean, too. Pots and pans stay bright. The insulated, heat-retaining oven is porcelain lined. And a few cents a day is all it costs to use.

Drop in today at your electric appliance merchant's or any Niagara Hudson System store.
