pose it. up the community.

All too often nowadays the idea prevails among a large class that community interest should take precedence over individual interest and that, theerfore. community should control the individual both for its! own good and his as well.

This is false doctrine. It is for each individual t work out his or her own destiny, and in doing so build a stronger character and thus develop a stronger community thru the strength of the people living in it. on others? There is no way to reverse the process. Let the community by force deprive the individual

munity, but impoverishes it. The weak, who are in the majority, are always ready to control and restrict the activities of the strong who are in the minority.

The power to work out our own destiny is what we commonly term liberty. But even liberty has its limitations, and the misuse of this power has given to the conception that man made government should control human conduct. Recognition of the rights of others by the individ-

ual in shaping his own life is the essence of liberty an license means the individual has failed to attain discipline because of ignorance, greed and selfishness. Recognizing the interests of the community all those who compose it is the only means of building up a strong and prosperous community, but the community should not go too far in attempting to deprive the individual of the freedom to work out his own salvation.

The fellow who went duck hunting the other day and returned empty handed, probably drew the conclusion that there is plenty of room around a duck.

Abbreviated Spelling

TITHAT with abbreviated electric signs, simplifi W spelling, trade names and downright illiteracy, good old English language is rapidly being deformed out of all similarity to its original self. It is only in America that such confusion and disrespect for the language is publicly condoned. Harper's Bazar editor points out.
