EXERCISE, SLEEP AND REST EXERCISE, especially outdoors, is necessary for every one whose work L' does not involve manual effort. Adults should endeavor to spend one hour and children two or more in the open air daily in active exercise. Part of the adult's exercise may be taken in walking to and from work where this is possible. Such games as tennis, little or too much sleep is harmful as are irregular sleeping hours. Beds

and skating are advisable. should be elastic and warm and admit the passage of air around them. Dancing is another way of taking extraise and is helpful where outdoor | A mattress of hair, felt or cotton on a exercise is not practicable. A few wire spring and pillows also of hair minutes spent doing calisthenics in | are preferable to feather beds and the morning is also of distinct advantage.

pillows; the latter are too heating. Cotton or linen sheets and pillow cases and woolen blankets are the The danger of overdoing is always In very hot weather the blankets should take any form of exercise may be discarded. Too many or too within an hour or two after meals. heavy bed clothes are not advisable. No one should begin too strenuously Pillows should be low because high and no exercise should leave one pillows hinder the movements of the

QUESTIONS: All wives and mothers should be able to answer these questions. 1. How much sleep is required · sdults? For children? How high should pillows be? 3. Should exercise leave one ' feeling exhausted?
