HEALTH in the HOME Practical Studies for Wives and Mothers

CARE OF THE BABY

Eminent Authority and Chief Medical Director New York Life Insurance Company

DREAST fed babies have the best chance to survive. The first year of life is the most critical one and for every breast fed baby that dies in the first year, three or four bottle fed ones die. The best life insurance for a baby is for it to be under the care of a competent baby doctor. The money speni in a visit once a week to the doctor in

the first few months and later once a month is much less than is spent at one time if the baby becomes il which a well-fed sturdy baby does

The best guides to baby's wellbeing are weight and its own actions. A baby should double its weight in six months and triple it in a year. it gains steadily, looks happy and acts it there is no need to worry. If it is necessary for a baby to be day. Dry whole milk may be used in artificially fed it should undoubtedly

be seen regularly by a pediatrician that is, a specialist in diseases children. Cow's milk has to be modified to conform to various formulae -all intended to change the constituents of a cow's milk approximately to the same strength as mother's milk. Only a doctor can do this accurately and judge when the baby's stomach is ready to be given '

One other fact regarding cow's milk: not only must it be clean when it comes into the house but it must be kept so until used. Even pasteur- | seventh will be on Food for the Family, ized milk needs care in this respect. | and Diet for Young Children.

purity of the milk up to the time it receive the same care and attention. t should be kept in the coolest place in the house, preferably in an ice-box

The best way is to mix all the milk for the day in the morning according to the formula in use. This may then be divided in separate bottles, stoppered and put on ice till needed. may be heated just before use. No milk should be kept over till the next emergencies, i. e., when traveling.

QUESTIONS: All wives and mothers should be able to answer these questions: 1. What is most critical period in baby's life? 2. What are best guides to baby's health? 3. How should milk be kent after delivery to your home?

This is the sixth of a series of 12 articles on Health in the Home. The
