FOOD FOR THE FAMILY

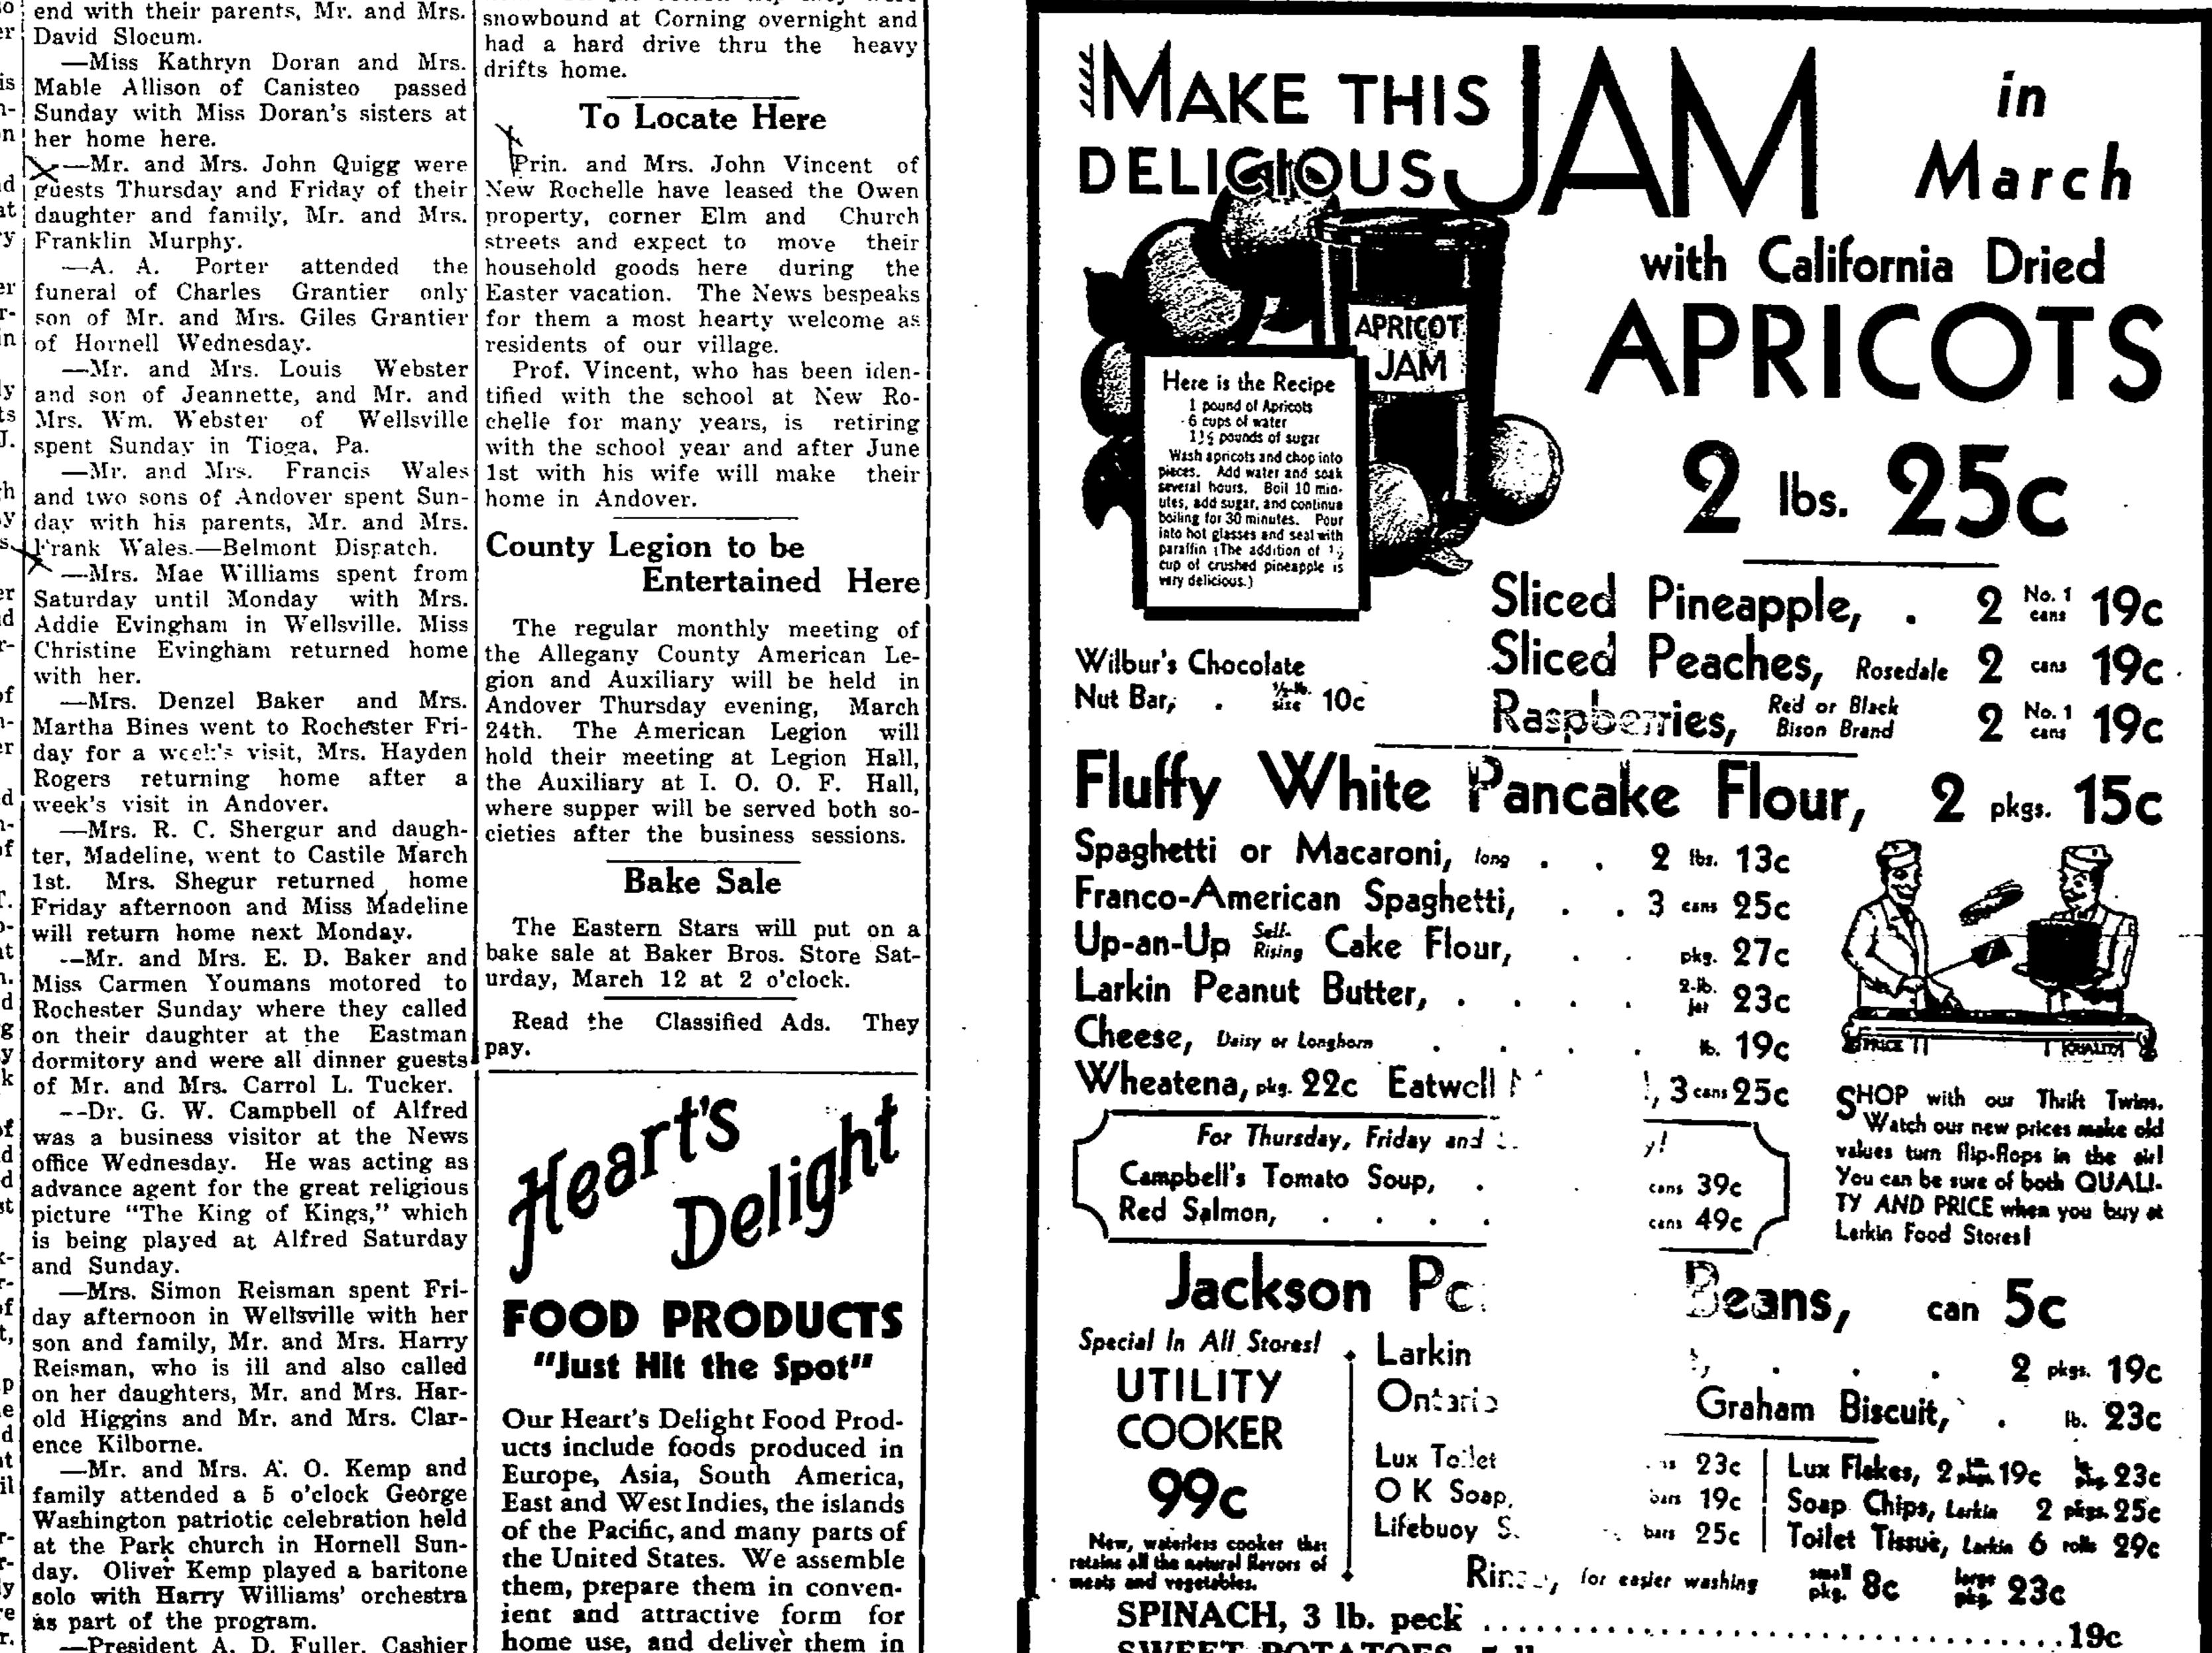

TT is not easy to lay down specific diets for everybody. Various factors I enter into the constitution of a diet. A man doing manual labor can utilize more heavy food than an office worker. Old people need less nourishment than those of middle age. People in cold northern climates require more meat and fat than those in DIET FOR YOUNG CHILDREN warmer countries. A growing child

needs more food proportionately than For very young children milk is an adult to build up the growing body. still the staple article of their diet. addition they should have some Good habits are easily formed in childhood in respect to eating as well as in other things. Often it is hard to get a child to take certain articles of food, such as spinsch (or other vegetendency, when too much meat and be included in their dietary. Gentle other solid foods are given, is for the tains more vitamines and other constituents, such as calcium, which are the article disliked at first. Gradually, essential to a growing child. as a rule, the dislike will wear off and

> QUESTIONS: All wives and mothers should be able to answer these questions 1. Should old people eat more of less than those of middle age? 2. How can young children b induced to eat food that is good for them? 3. Should meat b given to very young children?
