

### THE ECONOMIC STRENGTH OF OUR COMMUNITY

Banks are a part of the economic blood and sinew of all community life. Without banks commerce and industry could not carry on, nor contribute to the economic welfare of the people.

In times of prosperity unusual demands upon financial institutions are few; therefore their stability is considered a matter of fact. But when conditions drop to normal or below—'tis then the fundamental soundness and foundation strength of a bank is tested.

This institution was built upon solid rock and built to stand the test of both good times and bad times. With adequate resources it stands today a distinctive power in the promotion of local industry and community progress. Make this bank your bank.

#### Soil Preparation

The most important action in crop production, it pays to drag and rag and then drag some more. The only way to defeat low prices is to grow your crops at a low enough cost so that there is still a profit. That means large yields, which may only come from having the best seed bed. Oliver Harrows are noted for doing a good job and wearing a long time.

#### Listen In

Next Friday afternoon Betty Moore will tell you how to decorate Dining Room and Breakfast Nooks. Using Moore's products, Muresco, Sani Flat. A lot of beauty at small cost.

#### Scrub Seeds

There are few ways for a farmer to waste money faster than to scatter over his fields seeds of unknown quality. He may save a small amount in first cost but the loss in crop shortage is staggering.

When you are tempted to economize by buying seed at what appears a low price, just remember "That what so ever a man soweth that shall he also reap." And if you must economize buy less of the best and make that do.

Four to six quarts of the best seed you can obtain will give a better crop and without damage to your fields than three times as much of the other poor seeding wastes money and ruins soil. Good seed makes money and increases soil fertility.

#### Not Stubborn

Some time it seems that certain spots around the lawn and garden just won't produce as we feel they ought—in that event let us suggest that your trouble is soil hunger.

The greatest tonic in the world for hungry soil is Vigoro, the complete plant food and a regular square meal for lawns, gardens, plants and flowers.

Vigoro is clean, odorless, easy to use and inexpensive. Let us have your order for enough to convince you that it is a worth while expenditure that will pay big dividends.

#### Strong and Light

Solid braided cotton rope is well adapted to many uses around home and farm and is now at prices almost as low as hemp. Use for tie ropes, wire stretchers, tackle blocks and any place where light weight, great strength and flexibility is required.

The number twelve size that will stand a half ton strain now five cents a yard. This is a special price to reduce an over stock. No slivers in your hands when you handle cotton cord.

Before we can tell what the country is coming to—it will have to come to.
