PREVENTION OF ACCIDENTS CERIOUS accidents in the home are very common and often result in I fatalities. The National Safety Council reports that in a recent year there were 25,000 fatal accidents in American homes and that over 9,000 o

those who died were children under 15 years of age; also that there were 5 million non-fatal accidents in our homes. How safe is your home? Prevention is thousand times better than cure an most of the accidents which occur a ours. Young children are very often the victims. Many of them lose their lives or saffer serious and painful curies because of careformess of negli-

a the family. Here are a few suggestions sweiding accidents in the house. observed, there may prevent much suffering or even death and the heartaches and mainteness that comes shoes who realize too late the dire

. Fires and Stoves. Burning and scalding are the principal causes of death from home socidents romping and skylarking near the kitchen stove. Don't put a Any ope passing may knock a over and get erverely scalded. S. Gas. Don't leave children alone

in a room with a gas stove or where they can reach a gas jet. | 1. What are the principal causes turn on the gas and be amphyxiated. Be sure rooms with gas member the kettle may boil over sad put the gas out. Mechicity. Electric fans should be out of reach of little ingers.

Always stop a fan before moving they show signs of wear and tear. | Civic Health Regulations.

of accidental death among children in the home? . 2. Name two ways in which serious socidents can occur while taking a bath? 3. Why should children be forbidden to put things in their mouths?
