4 are the possibilities of air commerce?" Not so many years ago people were asking the We cannot compromise with crime. It is an un-er cooked or raw?" same question about automobiles and motor trucks. fortunate fact that all reform movements, based on well as automobiles are carrying on nation-wide com-criminal's own unmorality.

Many of the predictions of yesterday are already misguided sentiment, rigidly enforced, will deter more ties. Their only value in a poultry a reality in the aircraft world. Mail is being carried criminals in a moment than all the anti-pistol laws ever ration is that they furnish succudaily. Small shipments of merchandise and the like proposed could do in a year.

The present economic condition has retarded the progress of air commerce as it has all other activities, but soon the situation will be remedied and aircraft in the presence of women after you are baid. will resume its forward march. The fact that eight railroads are giving considera-

tion to the utilization above their yards and terminals for elevated landing platforms, and that working plans

FRIEND has been described as one to whom you can be killed when in the tiny crawlile boat dived and tossed, and still could be but one end to his career. tent to which the railroads are considering the opera-1' tion of air passenger, mail and express services conjunction with their regular transportation facilities. |

We will soon be utilizing the air as a means travel and commerce, especially long distance travel and shipping, as freely as we now use other means transportation and shipment.

Feople who think they are sick greatly nutnumber aggerate, he belittles. those who really are.

Overproduction

AVERPRODUCTION seems to be an overworked word! U at present. We are told that there is an overproduction of farm products, an overproduction of manufactured products, an overproduction of all raw materials. This may be true but we hardly believe to the extent of equaing the scope of present economic con An overproduction does not exist when measured his plans

in terms of human need. Potential markets exist for nearly all of our surplus of materials and manufactured products. What is needed is buying power. That is another problem, of course, but isn't it about time we were getting at the bottom of the trouble and not open to person may be delivered at buildings withblaming overproduction? we must give the average man buying power. This return. One cannot expect tolerance on the part of a second falling ten feet; or, tel

can be brought about by an expansion of credit—not others unless he or she is considerate and tolerant to- cubic feet of water a second falling petty credit as that of the week's grocery bill but of ward them. world credit. We cannot hold one hand ochind our back with the other outstretched for money if we are going to set the wheels of industry and trade into motion once more.

already as a means of expanding trade. This is a step in the right direction and can be carried out on a much larger scale if we get busy. Other nations, other countries, other states need what we have to sell them and cultivate. we need what they have. There is no overproduction but rather there is a faultiness in our distribution and marketing. Let's remedy the cause and get back to normal. It can be done and in short time.

The American Indians might be better off today if they had an immigration policy.

WORKER who condemns the job he has and the years have been added since 1897. conditions under which he works is helping make it more disagreeable. Likewise, a merchant who makes factors. Better sanitation, advancement of medical lack of cross-pollination and unless the statement that business is poor, helps to make it science, and improved living conditions and education growing near by, it would be desirmore so. This does not mean that either should not have contributed the leading benefits. be free to discuss their problems with others, especially at times or to people where it would be helpful.

Everyone should find some good features about 1 work, his business or his health or whatever the case may be and try to dwell on them instead of the bad features. In this way you can help yourself for surely the world. positive statements and discussion of the good things will lead to better things, where negative statements will only lead to worse conditions. In this time of emerging from an economic de-

pression, cheerful, positive statements are particularly valuable both to the individual and collective welfare of every community. We need to have confidence and THE early return of prosperity to our country de-set in Village Hall to hear comhope thoroly restored that progress and prosperity may | pends in a large measure upon the courage of the plaints relative thereto. can help do your part by being more optimistic—not tising appropriations instead of reducing them. false optimism but genuine cheerfulness born of hope

Exorbitant Gasoline Taxes

It to six cents a gallon in different states, and the of renewed activity on his part. record is one of constant increases. The situation is reaching the point in most states where the tax is becoming a serious burden. The motorist does not ob-children have a dozen fights or so a day are real November 14, 1932, at 2 p. m. All ject to a fair tax for he knows that it will be of direct people. benefit to him in better roads and improved motoring conditions. But a high tax such as exists in many states is discriminatory and unfair.

The percentage of tax reaches 40 to 45 per cent. against the actual price of the gasoline in some instances and it seems to be a miracle that the public will tolerate such an exorbitant assessment.

Shake well before taking should be applied to advice as well as medicine.

Why Not Remove the Menace?

ANE of the most serious factors in our crime situa-U tion is that of the relantless "repeating" criminal. The newspapers are full of accounts of assaults, robberies and murders by thugs who have long record behind them of other crimes. These men are turned
