WHEN LIVES

You need the same tire protection that race drivers demand KELLY PETILLO ON MAY 30th WON the 500-Mile Indianapolis race on Firestone Tires, breaking the track record and driving the entire distance at a rate of 106,240

This record is an astounding demonstration of tire efficiency. To go 500 miles in less than five hours on this rough and humny 26-year-old brick track demonstrates the etrength and blowout protection that Firestone builds into their Gum-Dipped Tires. AB JENKINS ALSO RECENTLY DEMONSTRATED THE staming, efficiency, and blowout protection built into Firestone Gum. Dipped Tires. He drove his 5000 pound car over the hot salt beds at Lake Bonneville, Utah, 3000 miles in 231/2 hours. This was an average speed of 127.2 miles per hour, and although temperatures were as

high as 120°, he had no blowouts or tire trouble of any kind.

These records are made possible by special construction features built into Firestone Gum-Dipped Tires. Take no chances—protect your life and the lives of others by letting us equip your car with Firestone Tires.

Before you buy new tires ask yourself these three questions 1-"Will the tread give me the Answer No. 1 -- University tests greatest traction and show Firestone Tires stop your car 15% quicker than best tires.

Answer No. 2 -Unequaled per-* -"Are they built to give me the formance records prove that Gumgreatest blowout protection? Dipping gives the greatest blowout tection known. * -"Without sacrificing these two important safety features w they give me longer mileage,

We select from our enormous stocks of raw materials the best and highest grade rubber and cotton for the High Speed Tire. In our factory we select the balanced and and we know it is
