#### Babe Ruth's Trouble

THE majority of the legion of admirers of Babe Ruth, regret the fact that his closing days of active asso-) ciation with baseball should have to be clouded with controversy between himself and the management of, his club, and with publicity that is not constructive to the great record of this popular star of the great game. Babe Ruth has been one of the greatest attractions DACK near the beginning of things, our prehistoric with a high degree of success.

baseball has ever known not only because he has been f D forebears would have perished from the earth knocking the pellet into the bleachers in every park in they had not understood the science of reading adverwhich he has played for years, for a home run record tising. that will not soon be equalled or surpassed by another individual, but because he has been a colorful player soap or automobiles, but they did have to eat. The one who is liked by fans everywhere no matter what team who could follow the tracks of the game he hunted, or they may support. Ruth reached the peak several seasons ago and has best off in life.

been slipping downhill fast. Age has taken its toll of nature as it always does and the legs of the aging Babe tising was best dressed, best fed and most contented. will not stand the punishment that must be exacted from them for regular action on the field. He left the New York Yankees at the close of last ciple is just the same.

season and began the season this year with the Boston Braves as player and second vice-president. Friction liably best informed on what to eat and where to get developed almost from the beginning. It may have it; what to wear and how much to pay for it; what to been Ruth's fault or it may not have been, perhaps the do and where to do it. He's up on the most important trouble was inevitable—only those on the inside are things in life. Consequently he gets the most from qualified to express opinion. The first real fuel that life. was heaped on the fire was in the form of his failure to get his share of the spring training profits which make life livable and pleasant. We owe it much. were much more than usual due to the drawing card of Babe's appearance in the lineup. The argument reached the climax recently over a comparatively triv- a pound of ignorance. ial matter of a request of a short leave from duty which was asked by Ruth. He resigned before further action might be taken by other officials of the club. Thus, apparently the finis of the famous baseball career has been written for the mighty king of swat. Friends would have liked to have seen him retire a sea- have nobody mention it. son or so ago when his ability had not yet slipped to the point where he could not play an entire game and when he was still getting his share of the hits and the too many laws, but where is the man who can't sug-

#### Radio Reforms Itself

THE ARE glad to see the radio broadcasters waking | TT up to some of the objectionable practices which | thoughtful people have long recognized. One of the big radio chains has announced a new policy which. seems to us, sets a standard which all broadcasters ought to maintain. These policies relate both to the with the Office of Information advertising features of commercial broadcasts with riculture and home which most adults are either annoyed or disgusted.

for radio what is being done for the movies, in cleaning self-addressed, stamped envelope and loins, which are the sources of most up its programs intended for children by prohibiting will receive a direct reply to your the exaltation of criminals, the glorification of disrespect for authority and in all other ways prohibitinig ask more than one question in one ducklings too, are cheap. # TIRES MAY LOOK ALIKE ON THE OUTSIDE ON THE INSIDE THEY ARE DIFFERENT

HEAT on the inside created by friction is the main cause of blowouts. Firestone Tires are different on the inside—they are built with the patented extra process of Gum-Dipping that soaks every cord and insulates every strand with pure liquid rubber, preventing internal friction and heat. No other make of tire is Gum-Dipped.

Firestone performance records again emphasize the undisputed evidence that Firestone Tires are not only blowout-proof, but give greatest protection against skidding. There are three questions and answers that will solve the problem of what tires to buy:

QUESTION 1-"Will the tread give me the greatest traction and protection against

" ISWER—Recent tests by a leading University show that Firestone High Speed Non-Skia Tires stop a car 15% quicker than any other of the leading makes. For eight consecutive years Firestone Tires have been on the winning car in the dangerous Pike's Peak Race where a skid means death. This is undisputed evidence that Firestone gives car owners greatest protection against

QUESTION 2—"Are they blowout-proof?" ANSWER-Firestone Gum-Dipped Tires have the most amazing records for being blowout-

proof of any tires ever built. In the gruelling 500-Mile Race at Indianapolis, May 30th, every one of the 33 cars was equipped with Firestone Gum-Dipped Tires. Not one of the 33 drivers had any tire trouble of any kind.

Ab Jenkins drove his 5,000 pound car on Firestone Gum-Dipped Tires over the hot salt beds of Utah, 3,000 miles at 127.2 miles per hour, with temperatures as high as 120°, without tire trouble of any kind. These are most amazing proofs of blowout protection ever known.

JUESTION 3-"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can

"ISWER-Firestone High Speed Tires not only give you more than 50% longer wear, but also lowest cost per mile due to the tough, wear-resisting tread built with higher shoulders and a wider, flatter contour. This rugged tread is held securely to the Gum-Dipped cord body by Firestone's patentea construction of two extra layers of cords under the tread, a special construction feature not used in any other tire. Unequalea mileage records by thousands of car owners add undisputed evidence of longer wear ana greater economy of Firestone High Speed
