who lets low cost electricity take over her household

The week's washing done for about 2c with an electric washer!

A penny for electricity cleans the house from top to bottom!

Gone are the days when doing all your own work by hand was a sign of thrift. For now the thrifty housewife can let electricity shoulder much of the load at low cost. Your electric bill is an investment in hours of freedom! A few pennies a day will run all the electrical helpers you need. And the more electricity you use, the lower your cost per kilowatt hour.
