Baker's Hardware News

The rarest of all rare creatures is the man who gets a lot of money without letting the money get him. Painting In order to secure a good job of painting it is very necessary that the first coat is of the utmost importance. Thru many years of extensive paint research, Benjamin Moore & Co., have discovered a new type of paint long needed in the paint industry. The new product is known as Moorwhite Primer. Moorwhite Primer is a perfect priming coat. It covers the sappy spots as well as the dry ones. It forms a foundation on which further coat can adhere. It is one of the surest steps in attaining a satisfactory paint job. The hiding and covering capacity of this primer is exceptional and on old houses here in town where it has been used, the result has been more than could have been expected. Moorwhite Primer with a coat of Moore's regular outside paint over it makes a complete job and one that will last for years. Drains Clogged? Ejecto will open them—only 15c a can.
