low cost will do so much of your work

Most women just never do manage to find time to be luxuriously lazy for a little while! Here's one way to get free time: let low-cost electricity do more of your work. It can washand clean and cook, and do a dozen other jobs, all for only a penny or so That's because electricity is such a

bargain. The average family pays only 10c a day for all it uses. The more you use the less each kilowatt hour costs—like buying oranges by the dozen instead of one at a time.
