Why do we say The New Ford V-8

What is new about it?

Of course, the newest engine in the low-price car field is still the V-8 engine. Since Ford made it available to all car users (keeping it as economical as cars with fewer cylinders) the Ford V-8 has been the newest engine on the market and remains the newest for 1936.

You may buy a car on minor "talking points"—some specially advertised teature "with the car thrown in"—but, after all, it is the engine you buy when you buy a car. Hence we put the engine first. Other new points about the car make a long list.

Its lines are much more beautiful. The hood is longer and sweeps forward over the distinctive new radiator grille, giving the car a length and grace that are instantly impressive. The fenders are larger, with a wide flare. Homs are concealed behind circular grilles beneath the headlamps. New steel wheels.

Ford upholstery—always of sterling quality and excellent taste—is rich and enduring. The appointments of the car have a new touch of refinement. There

is no question about the increased beauty of the Ford V-8 for 1936.

In more practical matters, many improvements have been made-

Steering is made easier by a new steering gear ratio. The cooling system circulates 5½ gallons of water through a new, larger radiator. Natural thermosyphon action is assisted by two centrifugal water pumps. New style hood louvres permit a rapid air-flow around

> Easier, quieter shifting of Ford gears -The gear shift lever now travels a

brakes - Brakes that stop the car with ease and certainty. Ford Super-Safety Brakes of the long-tested, fool-proof. mechanical design.

Safety - as always - in the electrically welded genuine steel body. Safety Glass all around at no extra cost. Hundreds have written grateful letters because this glass has protected the safety of their families.

A car you can drive without strain all day, if you like, in city or country

driver's touch like a well-trained horse. You don't have to "push" or "fight" the Ford V-8 — driver and car easily get on terms of good understanding with

An engine has much to do with the roominess of a car. Very much indeed. A long engine uses up car space. The compact V-8 engine permits much of the ordinary engine space to be used by

It really is a great car in every way. this 1936 Ford V-8 - the finest, safest, most dependable Ford car ever built Now on display by Ford dealers.
