of the work and art involved.

ORIGINAL POEM

O'd bronsides was a faithful ship She bravely roved the sea, Alas, the cap'ain on the deck No more his ship will see. She'll disappear with a cannon She'll sink beneath the waves; Oh, what a death for a ship like

So faithful and so brave.

What's this, she's not going beneath the wave, To such a sorry, sorry grave? No, she'll ride the white capped' burning wave Until they send her to her grave. For such a loyal battered steed. She'll ride an anchor till she dies; Watched by eager, shining eyes.

A Series of Brief Discussions on Driving, Dedi-

cated to the Safety, Comfort and Pleasure

of the Motoring Public. Prepared

by General Motors

are interested in discussing here. What we are now

concerned with is taking curves and corners. From

time to time in these discussions we will find that

the same old laws of Nature will be involved. Fore-

most among them will be the laws of momentum, and

us going, but going in the same direction. When it is

please. For then we call it "centrifugal force."

Force trying to push us off the road.

observed, but Nature's speed laws always are!

nomentum plays the major part in going around

trying to make us go straight instead of curving our

course, it operates under an assumed name, if you

Now of course we all know what centrifugal force

. We feel it when we go around curves. Highways

and railroads are banked at curves to offset centrifu-

gal force. Aviators bank their planes at turns by tip-

No. 1—CURVES AND TURNS

To MATTER how expert we may be as drivers, we are all apt to fall into

habits of driving that don't quite measure up to what we really know is

For instance, we all know that we ought to be careful about passing

the road, and sixteen cars in a row will reach half a block. This is probably

a new idea to most of us. If we kept it in mind, we would never pass a car

unless we were sure that there were no oncoming cars for a good long

But turning aside to pass is not the particular kind of turning that we

ping them with the controls. But even though we all know about centrifugal

force, few of us realize how powerful it is, and how much greater it gets the

A 3000-pound car making a turn of 500-foot radius, has to overcome

centrifugal force of only about 156 pounds at 20 miles an hour. But at 30 miles

with a turn or even half way around it and we feel Old Man Centrifugal

can do when we find we're going too fast. But just the same, approaching

that corner too fast has kept us from taking it as we should have liked to.

For if conditions permit, it is often desirable to increase speed as we go

around a curve. As long as our rear wheels are not being retarded, but are

actually pushing us around the curve, our steering is effective and our car

The long and short of it is that we can't take liberties with the laws o

nomentum and centrifugal force. Man's speed laws may not always be

So what do we do? We clamp down the brakes. It's the only thing we

an hour, that force has grown to 360 pounds, and at

60 it is nine times as great as at 20 . . . over fourteen

hundred pounds trying its best to push us off the

road! The only thing that keeps us on the road in the

first place is the friction between our tires and the

we're going. On road trips, for instance, after we

seems a small matter to increase our speed a few

miles an hour. Then after a while we may do the

same thing again. In other words, we keep putting

forward our basis of comparison till by-and-by we

have lost our usual sense of how fast we are going.

Then, the first thing we know, we are face-to-face

have driven at a certain speed for a long time, it

The trouble is that we often don't realize how fast

than the force of that friction, off the road we go.

cars, especially when another car is approaching from the opposite direction.

Dated September 18, 1935. MABEL ROGERS. Notice to Creditors

Pursuant to an order of Hon. Walter N. Renwick, Surrogute of

Mr. and Mrs. Eugene Hand and Our students at Wellsville High ture were swaying, stove doors rat have moved from Avoca to the Dan hereby given to all persons having claims against the Estate of Robert In the Matter of Miss Helen Bennett of Young Mingus, late of Andover, N. Y., de The Estate of William F. O'Connell, teacher attended a conference at Hartsville Republicans Win the Day Hickory and Howard Madison of ceased, to present the same with Raymond Stewart, superintendent with Mr. and Mrs. Ordo Williamson. undersigned Administrator of said Walter N. Renwick, Surrogate of Miss Genevieve McCormick called Estate, at the office of The Andover the County of Allegany, notice is

And yet there possibly isn't one of us

Now here's an interesting thing about

who hasn't, at one time or another, moved

over in the road to pass a car, and then

wondered if we would get around in time.

that. When we try to pass a car that's

going forty miles an hour, it's just the

same as if we tried to pass a standing

string of cars 126 feet long. In other words.

it's like passing eight cars parked bumper-

to-bumper in the road. If we try to pass

one going sixty, it's like trying to pass a

line of more than sixteen cars standing i.
