THE 25-MILLIONTH

HAS JUST BEEN BUILT

It has never occurred before in automobile history that 25 million cars of one make, bearing one name, have been manufactured under one management. The 25,000,000th Ford car rolled off the Ford Rouge Plant production line on January 18, 1937. 25 million cars since 1903 . . . more

than one-third of all the cars ever built . . . enough cars to transport the entire population of the United States. The figures represent a remarkable

contribution to the social welfare, the industrial stability and the general progress of our country. People respect Ford efficiency. They

know Ford uses fine materials, the best workmanship at good wages, the most exact precision measurements. They know these things are passed along to purchasers in the form of extra value. Naturally, they like to do business with such a company. That is the only reason it has been required to produce 25 million cars. Naturally, too, they expect

more of a Ford car, more this year than last year --- more

gained in building 25,000,000 cars enables Ford to produce today a really superb motor car at a really low price -with the Beauty, Comfort, Safety and Performance of much more ex-The 1937 Ford V-8 combines advanced design, all-steel construction, extra body room, and brilliant brakes
