HAS A DEFINITE ALKALINE EFFECT

The minute you begin to feel below par—alkalize with milk. The definite alkaline effect of fresh, cold milk helps bring you back. Because milk is one of the best natural alkalizers there is.

Milk definitely aids in overcoming the acids that accumulate in the blood. It's soothing helpful to the nerves . . . and builds up your alkaline reserve. You'll not only feel better after over-indulgence, over-work, or any of the thousands of causes of lowered blood alkali, but you will also have a new well of energy.

Remember—alkalize naturally with milk. . . . Simply drink a glass of milk at night.... another in the morning.

FREE BOOKLET-"Milk-the Alkalizer." Send your name and address to: Bureau of Milk Publicity, Albany

ANDOVER, N. Y., FOR THE WEEK ENDING FRIDAY, MAR. 26, 1987.

Lawrence Nawthome

Oftentimes, when I am dreaming

In the twilight's gentle glow,

Back to scenes I used to know.

Many friends of other days-

Friends whom I have lost forever

All the things we used to do!

By the names that come to mind

Fill this twilight hour with longing

For the friends I'll never find.

And it brings a pang of heartache

Of those friendships, after all—

That, if I had been more faithful

In the twilight's lonely glow.

They might now be here beside me

To the friends of long ago,

Yes, the memories awakened

On life's long, divergent ways.

In these dreams that can't come true;

Then I meet, in wistful fancy,

Oh, how joyfully I greet them,

And how eagerly I picture

When I drearily recall

And my thoughts make little journeys
