

FOR A NATURAL "COME-BACK" — JUST REMEMBER

MILK

HAS A DEFINITE ALKALINE EFFECT

The minute you begin to feel below par—alkalize with milk. The definite alkaline effect of fresh, cold milk helps bring you back. Because milk is one of the best natural alkalizers there is.

Milk definitely aids in overcoming the acids that accumulate in the blood. It's soothing . . . helpful to the nerves . . . and builds up your alkaline reserve. You'll not only feel better after over-indulgence, over-work, or any of the thousands of causes of lowered blood alkali, but you will also have a new well of energy.

Remember—alkalize naturally with milk. . . . Simply drink a glass of milk at night . . . another in the morning.

FREE BOOKLET—"Milk—the Alkalizer."
